Decisions, Values and Groups Dorthy Willner, 2013-10-22 Decisions Values and

Groups Volume 1 contains the proceedings of the First Interdisciplinary Conference of the Behavioral Sciences Division of the Air Force Office of Scientific Research held at the University of New Mexico in 1957. The papers explore the roles of decisions, values, and groups in the behavioral sciences and cover topics ranging from the use of mathematical models in decision making to the contribution of the laboratory to the study of individual differences. Theoretical contributions to small group research are also discussed. This book is comprised of 22 chapters and begins with an overview of the merging of mathematical and statistical techniques with the empirical method in the study of behavior, as well as the place of decisions, values, and groups in behavioral science research. The reader is then introduced to the applications of mathematical models to decision processes with particular reference to the automation of decision making. The following chapters focus on conceptualizations and designs for research in values and evaluative processes, theoretical aspects of small group research, and psychodynamic patterns of behavior and special problems in the military. A non-introspective approach to the study of human motivation is described. This volume will be of interest to behavioral scientists and social scientists.

[Handbook of Dynamics in Parent-Child Relations](#) Leon Kuczynski, 2003. This is a truly exceptional collection of contributions on the dynamics of family relationships. The authors not only provide thoughtful state-of-the-art reviews of relevant bodies of literature and methods but also grapple with thorny conceptual issues and present novel theoretical insights. In doing so, they demonstrate the tremendous progress in thinking about families in the past decade or two and provide guideposts for future theory and research on parent-child relationships. Nancy Eisenberg, Regents Professor of Psychology, Arizona State University. This forward-looking volume will be invaluable to all concerned with parent-child relationships. With chapters written by leading researchers in the field, it focuses on process and on the agency of both parent and child. The approach is therefore dialectical: changes in either partner continuously lead to change in the other. A must for teachers, researchers, and graduate students. Robert A. Hinde, St. John's College, Cambridge.

United Kingdom Handbook of Dynamics in Parent Child Relations provides an innovative interdisciplinary perspective on theory research and methodology of dynamic processes in parent child relations Edited by distinguished scholar Leon Kuczynski this accessible volume is divided into six parts Part I concerns dyadic processes in parent child relationships and provides the conceptual grounding for the volume as a whole Parts II and III examine the agency of the child and the agency of the parent respectively Part IV considers dynamics in the parent child dyad as they are mediated by or impact on various lifespan cultural and ecological contexts Part V addresses the methodological implications of adopting a dynamic process view of parent child relations Part VI weighs future directions for theory research and practice An eminent group of scholars and researchers present a comprehensive exploration of parent child relationships that includes the nature of change in parent child interactions cognitive behavior and relational processes that govern parent child relationships what makes such interactions and relationships work the way they do the dynamics of parent child relations including bidirectional influence and human agency quantitative and qualitative methodology in the context of theory verification and discovery Handbook of Dynamics in Parent Child Relations focuses on process rather than outcomes bi directional influence rather than parent effects or child effects and parents and children as agents and actors rather than as static traits or variables This concern with dynamics represents an emerging research perspective that complements a long standing alternative tradition primarily concerned with the products of parenting Interdisciplinary in scope Handbook of Dynamics in Parent Child Relations will appeal to academics professionals graduate students and senior level undergraduates involved with Developmental Psychology Family Science Human Ecology and Family Sociology

Lasby, 1997 Previous Eisenhower biographers have touched on his heart condition but Clarence Lasby is the first to examine the impact of the president's health on the nation He offers a dramatic revisionist account of the events surrounding the president's 1955 heart attack and subsequent efforts by the president and his staff to minimize its political impact Drawing on newly opened medical records and personal papers of Eisenhower's physicians Lasby challenges virtually everything we have believed about the president's heart attack Most disturbingly he has discovered that the president's personal physician Dr Howard

Snyder misdiagnosed the attack as a gastrointestinal problem and waited ten hours before sending Eisenhower to the hospital Lasby also sets the record straight on how the president and his aides managed the public's understanding of events and he offers evidence that Eisenhower Dr Snyder and press secretary James Hagerty withheld and recast information to serve the president's political priorities Equally important Lasby's book offers a touching portrait of a proud man faced with a debilitating disease It examines Ike's private struggle to lead a full life despite his condition and analyzes his decision to seek a second term even against the advice of cardiologist Paul Dudley White It also shows how a man who had always carefully joked after his health now became obsessed with it
