

PREFACE

This basis for this research originally stemmed from my passion for developing better methods of data storage and preservation. As the world moves further into the digital age, generating vast amounts of data and born digital content, there will be a greater need to access legacy materials created with outdated technology. How will we access this content? It is my passion to not only find out, but to develop tools to break down barriers of accessibility for future generations.

In truth, I could not have achieved my current level of success without a strong support group. First of all, my parents, who supported me with love and understanding. And secondly, my committee members, each of whom has provided patient advice and guidance throughout the research process. Thank you all for your unwavering support.
