Proliferation of Precision Strike Randy Huiss,2012-11-05 **Weapon Systems ,** *Sustaining America's Precision Strike Advantage* Mark Gunzinger,Bryan Clark,2015 The dynamic between two militaries that each have PGMs and precision defensive capabilities can be called a salvo competition In this competition both combatants seek to gain the advantage by improving their capabilities to attack with precision and or defend against precision strikes This report uses a salvo competition framework to assess new operational concepts and PGM technologies that could sustain the U S military s precision strike advantage in future conflicts To bound the scope of the salvo competition challenge the report focuses on the U S military s air and maritime strike capabilities This limitation is not intended to diminish the importance of ground based strike systems such as the Army Tactical Missile System ATACMS in future wars The report also focuses on the offensive dimension of the salvo competition Opportunities for DoD to more effectively defend against precision air and missile strikes will be the subject of future CSBA research

Precision Strike Warfare and International Intervention Mike Aaronson,Wali Aslam, Tom Dyson, Regina Rauxloh,2014-09-15 This book explores whether the new capabilities made possible by precision strike technologies are reshaping approaches to international intervention Since the end of the Cold War US technological superiority has led to a more proactive and some would argue high risk approach to international military intervention New technologies including the capacity to mount precision military strikes from high level bombing campaigns and more recently the selective targeting of individuals from unmanned aerial vehicles UAVs have facilitated air campaigns supported by Special Forces without the commitment of large numbers of troops on the ground Such campaigns include for example NATO s high level aerial bombardment of Milosevic s forces in Kosovo in 1999 and of Gaddafi s in Libya in 2011 and the US operation involving Special Forces against Osama Bin Laden The development of UAVs and electronic data intercept technologies has further expanded the potential scope of interventions for example against Islamic militants in the tribal areas of Pakistan This volume examines three key and interrelated dimensions of these new precision strike capabilities 1 the strategic and foreign policy drivers and consequences 2 the legal and moral implications of the new capabilities and 3 the implications for decision making at the strategic operational and tactical levels This book will be of much interest to students of war and technology air power international intervention security studies and IR **RUSI Defence Systems** ,2006 **Global Precision Strike** Daniel Gouré,2013 The first conflict dominated by precision strike capabilities Desert Storm occurred more than two decades ago Since then all conflicts in which the United States has engaged have been marked by the extensive even overwhelming

application of precision strike capabilities In fact the U S military worked for decades to achieve its current level of capability which can be described simply as one aircraft one weapon one target A central strategic issue for the future is whether the United States military can maintain its dominant position in the face of three challenges to the current U S dominance in global precision strike The first challenge is the proliferation of so called anti access area denial A2 AD capabilities designed specifically to counter the U S dominance of the air The second is the shift in the focus of political military interests to the Asia Pacific The third challenge is the ability of precision strike forces to address an evolving target set There are five critical steps to preserving U S dominant precision strike in the first half of the 21st century Weapon systems United States.
