The Practice and Procedure of the Inter-American Court of Human Rights Jo M. International Protection of Socio-Economic Rights Aristi Volou, 2025-12-29 This book argues that there are weaknesses in the international systems of socio economic rights protection and that these weaknesses can be mitigated or overcome through the practice of interaction between these systems The work examines the international protection of socio economic rights and shows that it is vulnerable in terms of its personal and material scope its content and the extent of permissible limitations Against this background it explores the role of interaction between legal orders as a tool for improving this protection Based on a large scale survey of explicit cross referencing across a substantial number of monitoring bodies courts and systems in cases and other jurisprudential outputs the book assesses the extent to which interaction takes place in the context of the international protection of socio economic rights Drawing on its own conceptual framework of interaction between legal orders it then illustrates the dynamics of how interaction has been used to mitigate or overcome the weaknesses of international protection and to advance this protection While also recognising the shortcomings the work calls for better interactive practices and sets out criteria that should inform interactive practices going forward The book will be a valuable resource for academics

The 3 Regional Human Rights Courts in Context Laurence Burgorgue-Larsen, 2024-02-28 At specific moments in the history of Africa Europe and Latin America each region decided to create supranational jurisdictions to protect human rights These are in chronological order the European Court of Human Rights the Inter American Court of Human Rights and the African Court on Human and Peoples Rights While each has been the subject of important dedicated monographs no major study has analysed both the institutional and jurisprudential issues of all three regional systems

The 3 Regional Human Rights Courts in Context Justice That Cannot Be Taken for Granted is the first book to offer a comprehensive comparison of the three systems Rather than merely juxtaposing analogous features the book considers how the three courts operate as parts of a greater integrated whole Similarities and differences between the courts are illuminated alongside historical political and sociological insights in addition to the book's primary legal focus Close analysis of the processes by which the courts came into being makes it clear that regardless of distinct political cultural or other variances states on each of the three continents have chafed against international supervision The book also debunks the common belief that after the Second World War the thrust of human rights initiatives was so powerful that states no longer need to discuss them Justice cannot be taken for granted a position further supported by the book's analysis of how each court has evolved and how their rulings have been implemented Laurence Burgorgue Larsen's dynamism and multidisciplinary approach makes it possible to truly understand the stakes behind the institutional and jurisprudential developments of the three regional human rights courts This is a book that will interest not only legal practitioners but also specialists in international relations human rights and countless other fields
