**Valuation Theory and Its Applications** Franz-Viktor Kuhlmann, Salma Kuhlmann, Murray Marshall, 2002-01-01 This book is the first of two proceedings volumes stemming from the International Conference and Workshop on Valuation Theory held at the University of Saskatchewan Saskatoon SK Canada Valuation theory arose in the early part of the twentieth century in connection with number theory and has many important applications to geometry and analysis the classical application to the study of algebraic curves and to Dedekind and Prufer domains the close connection to

the famous resolution of the singularities problem the study of the absolute Galois group of a field the connection between ordering valuations and quadratic forms over a formally real field the application to real algebraic geometry the study of noncommutative rings etc The special feature of this book is its focus on current applications of valuation theory to this broad range of topics Also included is a paper on the history of valuation theory The book is suitable for graduate students and research mathematicians working in algebra algebraic geometry number theory and mathematical logic

*Resolution of Curve and Surface Singularities in Characteristic Zero* K. Kiyek, José Luis Vicente Córdoba, 2004-10 This book covers the beautiful theory of resolutions of surface singularities in characteristic zero The primary goal is to present in detail and for the first time in one volume two proofs for the existence of such resolutions One construction was introduced by H W E Jung and another is due to O Zariski Jung's approach uses quasi ordinary singularities and an explicit study of specific surfaces in affine three space In particular a new proof of the Jung Abhyankar theorem is given via ramification theory Zariski's method as presented involves repeated normalisation and blowing up points It also uses the uniformization of zero dimensional valuations of function fields in two variables for which a complete proof is given Despite the intention to serve graduate students and researchers of Commutative Algebra and Algebraic Geometry a basic knowledge on these topics is necessary only This is obtained by a thorough introduction of the needed algebraic tools in the two appendices
