**History of the Big Bonanza** Dan De Quille, 1876      **History of the Big Bonanza: An Account of Nevada's Silver Rush** Dan de Quille, The bare mention of a mine of silver calls up in most minds visions of glittering wealth and a world of romantic situations and associations All no doubt have read the story of the Indian hunter Diego Hualca who in the year 1545 discovered the world famous silver mine of Potosi Peru How while climbing up the face of a steep mountain in pursuit of a wild goat this fortunate hunter laid hold upon a bush in order to pull himself up over a steep ledge of rocks and how the bush was torn out by the roots when lo wonderful store of wealth was laid bare In the roots of the upturned bush and in the soil of the spot whence it was torn the eyes of the lone Indian hunter beheld masses of glittering silver Having all our lives had in mind this romantic story and having a thousand times pictured to ourselves the great shining lumps of native silver as they lay exposed in the black soil before that Indian who stood alone in a far away place on the wild mountain we are apt to imagine that something of the same kind is to be seen wherever a silver mine exists Besides we have all heard the stories told by the old settlers of the Atlantic States in regard to the wonderful mines of silver known to the Indians in early days Hardly a State in the Union but has its legend of a silver mine known to the red men when they inhabited the country This mine was pretty much the same in every State and in every region Upon the removal of a large flat stone an opening resembling the mouth of a cavern was seen Entering this you found yourself in a great crevice in the rocks and the sides of this crevice were lined with silver which you forthwith proceeded to hew and chip off with a hatchet kindly furnished you by your Indian guide You worked rapidly as according to contract you had but a limited time to remain in the mine When the Indian at your side announced your time up the tomahawk was taken from your hand even though you might have an immense mass detached save a mere clinging thread Only men who had saved the life of some Indian of renown were ever led to these silver caverns and they were invariably obliged to submit to be blindfolded so that none of them were ever able to find their way back to the mines they had been shown These and kindred stories have placed masses of native silver and deposits of rich ores of silver very near to the surface of the ground in the popular mind No doubt there are many places in the world where native silver exists almost upon the present surface as was the case in the Potosi mine in Peru and as was the case with the rich deposit of silver ore first found on the Comstock lode but those who visit the present mines of the Comstock will find little in them that at all agrees with their preconceived notions of silver mines On the surface they will find nothing that is glittering nothing that is at all romantic The soil looks much the same as in any other mountainous region and the rocks seem to have a very ordinary look to the inexperienced eye The general hue of the hills is a yellowish brown and all about through the rents in the ashen hued sagebrush which clothes the country peep jagged piles of granite the bones of the land showing through its rags
