Public participation in environmental decisions: Recent developments in Hungary¹

Edited by Anna Vári and Joanne Caddy

Environmental protection cannot be accomplished by experts and officials alone. Broad-based public participation can help ensure that policies address widely felt concerns, and that they receive the popular consent necessary to be effective. Many also see the opportunity to participate — in the environmental sphere as in other areas of public life — as a democratic right. But it takes time and resources to ensure that all parties are informed, and that everyone's voice is heard. Demands for opportunities for participation must somehow be reconciled with expectations that decisions be efficient, timely, accountable to all (and not just those with the loudest voices), and that they accord due weight to expert views.

These contrasting demands and expectations pose special challenges in eastern and central Europe, now engaged in cleaning up after decades of environmental neglect, while struggling through a transition towards democracy and a market economy. *Public participation in environmental decisions* examines Hungary's experience during the 1990s. The lessons provided by this useful collection of case studies will also be relevant elsewhere.

Mechanisms for public participation have expanded since Hungary's transition to democracy in 1990. Citizens have responded with enthusiasm, organizing more than 700 environmental organizations. While this testifies to the vitality of civil society (indeed, the environmental movement contributed to the overthrow of the socialist regime in the late 1980s), many challenges to effective participation have also become evident, indicating a gap between legislative provision and practical reality.

Ideally, in a transitional democracy like Hungary public participation will not merely make possible better decisions; it will also serve as a "school for democracy," in which citizens build political skills — from lobbying to mobilizing independent expertise — in a process of social learning that can be applied to other political realms. In practice, the urgent demands of a rapidly changing economy and society tend to sweep aside plans for broad-based social learning, and overworked environmental agency staff come to view public participation as merely another device to increase their workload. A persistent culture of secrecy and paternalism among officials, and limited knowledge among citizens about their rights, sometimes make public consultation a meaningless formality. Economic recession has also discouraged many Hungarians from pursuing concerns beyond their immediate material wellbeing.
