**Food and Agriculture Organization of  
the United Nations**

## **Managing Smallscale Fisheries Alternative Directions And Methods:**

**Managing Small-scale Fisheries**, 2001 Managing Small-scale Fisheries Fikret Berkes, 2001 *Managing Small Scale Fisheries Alternative directions and methods* Small-scale Fisheries Management Robert S. Pomeroy, Neil Andrew, 2011 This book contains 12 chapters on the development management marketing effects of climatic change and poverty reduction in small scale fisheries in developing countries and rural areas *Co-management of fisheries and mangroves as a pathway to the ecosystem approach to fisheries* FAO, 2024-10-07 The CFI programme a global partnership between FAO UNDP UNEP Conservation International the World Bank and the WWF has developed three legacy Global Knowledge Products GKPs to consolidate experience and lessons learned and to make its successful approaches and tangible impacts sustainable beyond the end of its five year cycle This e book is the first of the series Within its overall objective of demonstrating holistic ecosystem based management and improved governance of small scale coastal fisheries the CFI has learned that co management schemes that empower local communities women as well as men to act as stewards of their own resources can result in the sustainable use of fragile habitats such as mangrove forests in ways that can guarantee thriving livelihoods and conservation at the same time This e book describes the methodologies and results achieved by the CFI in Indonesia Latin America Ecuador Peru and West Africa Cabo Verde Cote d'Ivoire Senegal which can be adapted to local contexts anywhere in the world It is aimed at national and international policymakers practitioners and development agencies and is enriched with testimonies from beneficiaries across these geographies *Improving our knowledge on small-scale fisheries: data needs and methodologies* Food and Agriculture Organization of the United Nations, 2017-01-01 Small scale fisheries play an important role in contributing to food security nutrition livelihoods and local and national economies However there is often limited data and information available or not easily accessible on their contributions and hence small scale fisheries tend to be overlooked and marginalized in policy processes leading to low levels of support for the sector The Voluntary Guidelines for Securing Sustainable Small Scale Fisheries in the Context of Food Security and Poverty Eradication the SSF Guidelines adopted by the FAO Committee on Fisheries COFI in 2014 provide a policy framework for how to ensure sustainability for small scale fisheries through a holistic and integrated approach However this transformational process needs substantial support to take place and be successful which may be difficult to obtain in the absence of better data and information on the socio economic contributions of small scale fisheries For this reason a new study has been proposed by FAO and WorldFish to build upon the 2012 World Bank FAO and WorldFish Center report Hidden Harvest The Global Contribution of Capture Fisheries The new study would deepen the knowledge and encourage data sharing on small scale fisheries and their socio economic contributions and also aim to make policy and decision makers aware of the sector's importance *Approaches and frameworks for management and research in small-scale fisheries in the developing world*, **Marine Ecosystems**, 2024-02-28 Marine ecosystems are very productive and include the open ocean the deep sea ocean and coastal marine

ecosystems each of which has different physical and biological characteristics The biodiversity of some of these ecosystems is very rich and abundant offering unique opportunities for high yield production of proteinaceous material which is a source of high quality foods Biodiversity is fundamental to sustaining marine ecosystem services such as food security maintenance of water quality and recovery from perturbations which are currently being threatened worldwide The main threats to marine biodiversity are habitat loss eutrophication overexploitation pollution by hazardous substances introduction of non native species and other human activities Efforts to reduce these pressures are essential for coastal water quality recovery of ecosystem services global food security and ecosystem stability Bioindicators are important tools to be used as early warning signals to detect the presence of natural and chemical stressors when monitoring and managing ecosystems and thus promoting ecosystem health The protection of biodiversity is a major target of the European Union Marine Strategy Framework Directive requiring an assessment of the status of biodiversity on the level of species habitats and ecosystems including genetic diversity and the role of biodiversity in food web structure and functioning The restoration of marine ecosystems can support the productivity and reliability of goods and services that the ocean provides to humankind to maintain ecosystem integrity and stability Some of the goods produced by the marine ecosystem services are fish harvests wild plant and animal resources water and services that provide recreation tourism breeding and nursery habitats water transport carbon sequestration erosion control and habitat provision This book comprises six chapters that discuss the ecological economic and social roles of a variety of organisms from primary producers to consumers relating these roles with water quality and conservation of estuarine and marine ecosystems and thus the contribution to human health

**Small-Scale and Artisanal Fisheries: Insights and Approaches for Improved Governance and Management in a Globalized Context** Steven W. Purcell, Beatrice Irene Crona, Robert Pomeroy, 2020-08-21 Monitoring and Managing Queen Conch Fisheries Paul Medley, 2008 This publication presents guidelines on the requirements for responsible management of the fisheries exploiting Caribbean queen conch *Strombus gigas* with particular emphasis on the requirements to comply with the relevant regulations of the Convention on International Trade in Endangered Species of Wild Fauna and Flora CITES This manual describes the basic fisheries management cycle which includes development and interpretation of policy the need for management controls to regulate fishing activities data collection and analysis decision making enforcement of and compliance with the management controls and regular feedback and review of the management system It provides general guidance on each of those steps for the queen conch fisheries of the Caribbean It also provides three examples of management systems for industrial artisanal and non directed fisheries Publisher's description **Issues for Community-based Sustainable Resource Management and Conservation**, 2002 Guidelines for Designing Data Collection and Sharing Systems for Co-managed Fisheries, 2005 FAO Fisheries Technical Paper, 2006 **Proceedings of the Gulf and Caribbean Fisheries Institute** Gulf and Caribbean Fisheries Institute, 2008 **The Common Property**

**Resource Digest** ,2001 *Proceedings of 31st Scientific Meeting of the Association of Marine Laboratories of the Caribbean (AMLC)* Association of Marine Laboratories of the Caribbean. Scientific Meeting,2005 *Towards Integrated Assessment and Advice in Small-scale Fisheries* Food and Agriculture Organization of the United Nations,2008 The document presents the principles and processes for integrated assessment and advice in small scale fisheries The first chapter discusses failures of conventional assessment and management approaches Chapter 2 presents the conceptual origins and principles of integrated assessment of small scale fisheries The framework is then introduced and places the assessment within the broader planning and management cycle The final chapter discusses the implementation of the IAA framework

Publisher s description **Local Commons and Democratic Environmental Governance** Takeshi Murota,Ken Takeshita,2013 The rising tide of globalization poses a direct threat to the viability of small communities worldwide Such communities however are our greatest hope for sustainable environmental governance as they possess unparalleled ability to directly manage common pool resources Providing a much needed antidote in this age of globalization this volume advances the idea of collaborative governance as an integration of open and closed commons Taking into consideration the dimension of conflict resolution it studies examples of governance structures in various countries around the world to develop a new type of democracy towards multilevel environmental governance that involves the public private and commons spheres With contributions from researchers in a wide variety of disciplines this volume demonstrates through institutional and empirical analyses the essential role of local commons in providing an axis of resistance to increasing environmental devastation and social inequality towards creating a sustainable future for local communities as well as society at large **Community Fisheries Management Handbook** Anthony Charles,Jennifer Graham,Arthur Bull,Gorsebrook Research Institute for Atlantic Canada Studies,2006 *South African Journal of Marine Science* ,2002 **Indigenous Use and Management of Marine Resources** Nobuhiro Kishigami,James M. Savelle,2005
