

A photograph of two children, a boy and a girl, sitting at a wooden table. They are both looking down at a tablet computer that is lying flat on the table. The boy is on the left, wearing a blue polo shirt, and the girl is on the right, wearing a light-colored sweater. The background is a blurred indoor setting, possibly a classroom or library, with bookshelves visible. A semi-transparent white box with a dark border is overlaid on the bottom right of the image, containing the title and author information.

Managing the Flow of Technology Thomas J. Allen,1984-01-04 The original edition of this book summarized more than a decade of work on communications flow in science and engineering organizations showing how human and organizational systems could be restructured to bring about improved productivity and better person to person contact While many studies have been done since then few of them invalidate the general conclusions and recommendations Allen offers In a new preface he points out new developments noting areas that need some modification elaboration or extension and directing readers to the appropriate journal articles where the findings are reported The first three chapters provide an overview of the communication system in technology present the author s research methods and describe differences in the career paths and goals of engineers and scientists that cause special problems for organizations The book then discusses how technological information is acquired by the R D organization shows how critical technical communication within the laboratory is for R D performance and originates the idea of the gatekeeper the person who links his or her organization to the world at large Concluding chapters take up the influence of formal and informal organization and of architecture and office layouts on communication Many of these ideas have been successfully incorporated by architects and managers in the design of new R D facilities and complexes

Managing Technology for Business Value Stephen McLaughlin,2020-05-07 This book will appeal primarily to

postgraduate business studies students who seek to better understand how to use technology to improve organizational performance. It provides insights into how technology can both positively and negatively influence the way we create, share, and act upon information and knowledge. Taking as a starting point the premise that we now live and operate in a knowledge-intensive, information-driven world where data is arguably the most valuable resource any organization possesses, it argues that we cannot see technology simply as a commodity or a cost to the business. Therefore, every organizational decision maker must be more aware of the impact technology can have on the knowledge practices and habits of employees, building and sustaining collaborative relationships, and the ability to realise strategic goals in a dynamic and highly competitive environment.
