Clayton,1970      **Market Citizenship** Amanda Root,2007-07-21 Citizens are caught in a paradox Voting levels are falling there are growing feelings of powerlessness social unfairness and yet citizens are constantly told that they have more choice as well as greater freedom and liberty This book brilliantly explains these discrepancies It shows that the new definitions of freedom as responsibility to create prosperity through markets is seriously distorting citizenship whilst appearing to be unbiased and neutral It exposes inconsistencies in the market based and apolitical vision of our collective future This book outlines how market citizenship involves a new kind of rationality in which citizens are defined as individualized utility maximizers shows how the idea that citizens act primarily to develop their narrow self interest has encouraged the creation of competitive governance mechanisms analyses how market mechanisms are used to decide who are winners and losers from the loss of youth groups funding to global treaties discusses the shortfalls when key contemporary issues are tackled through win win solutions with business working alongside consumers with little or no role for government explains how localism and the devolution of power is being used to support the status quo suggests new kinds of engagement are emerging because markets have undermined politics Essential reading for students policy makers and researchers of citizenship within sociology politics economics geography and social policy      **The Culture of Athens** James P.
