Pianists Problems:

The Pianist's Problems William Newman, 1986-03-22 The reader must have noted in the favorite magazines of the practicing pianist how often the same troubled queries reappear How can memorizing be made easier and more secure How can the fourth and fifth fingers be strengthened What produces musicianship These and many others are perennial questions of the greatest practical importance to student teacher and performer Strange then that adequate answers are so hard to find With all the time and effort devoted to the study of the piano with all the advances in the psychology of training with all the special studies that have been conducted there should be by now if not one right answer to each question at least a preferred answer that will be right for the large majority of pianists As a matter of fact there are preferred answers in almost every instance The need is to bring these answers together in one place and to present them in nontechnical language as a concise up to date coordinated philosophy of piano playing To meet this need the present book has been written from the Preface

Arroyo Acevedo, 2025-09-17 The promotion of health in universities is of great importance as it allows for the encouragement of healthy lifestyles and the prevention of diseases among students teaching staff and administrative personnel The university is a conducive environment for the promotion of healthy habits since firstly it is usually the moment when the students make decisions under their responsibility and secondly it is a place where academic sports and social activities take place so it is also an ideal moment to promote changes that can be transferred to society and the rest of the individual's life Health promotion in universities can cover several areas such as healthy eating physical exercise prevention of addictions emotional and social mental health among others It can also involve the entire university community from students to administrative and teaching staff In the case of students it is essential as it is a period of change and habit formation and the fact that they will be the future decision makers of society **Notable Twentieth-century Pianists** John Gillespie, Anna Gillespie, 1995 Pianists their lives performances and recordings are detailed in this two volume set Each biographical essay emphasizes musical background and training special influences on development significant performances and more Performance is analyzed and emphasis given to style and repertoire For those pianists who recorded
