Microcomputer Applications In Statistical Hydrology:

Microcomputer Applications in Statistical Hydrology Richard H. McCuen,1993 *Microcomputer Applications in Statistical Hydrology* Richard H. McCuen,1993 This applications oriented guide provides all the statistical tools needed to solve a range of real world hydrologic modelling problems Offering sample computer programs their output and interpretations it covers commonly used methods as well as more involved methods *Flood Frequency Analysis* Khaled Hamed,A. Ramachandro. Rao,2019-04-30 After five decades the field of Statistical Hydrology continues to evolve and remains a very active area of investigation Researchers continue to examine various distributions methods of estimation of parameters and problems related to regionalization However much of this research appears in journals and reports and usually in a form not easily accessible to practitioners and students *Flood Frequency Analysis* answers this need by presenting the most popular and promising distributions and estimation procedures in a unified format It offers the details that provide the basis for the computations and illustrates each procedure with real data **Application of Accelerated Corrosion Tests to Service Life Prediction of Materials** Gustavo Cragolino,1994 A comparison of how different industries are addressing the development and selection of materials to use for such purposes as nuclear and other hazardous waste disposal and transport structures designed to last a long time and systems subject to economic pressures that keep them from frequent mai *Modeling Hydrologic Change* Richard H. McCuen,2016-04-19 Modeling hydrologic changes and predicting their impact on watersheds is a dominant concern for hydrologists and other water resource professionals civil and environmental engineers and urban and regional planners As such changes continue it becomes more essential to have the most up to date tools with which to perform the proper analyses and m *Evapotranspiration* Leszek Labedzki,2011-03-16 Evapotranspiration is a very complex phenomenon comprising different aspects and processes hydrological meteorological physiological soil plant and others Farmers agriculture advisers extension services hydrologists agrometeorologists water management specialists and many others are facing the problem of evapotranspiration This book is dedicated to further understanding of the evapotranspiration problems presenting a broad body of experience by reporting different views of the authors and the results of their studies It covers aspects from understandings and concepts of evapotranspiration through methodology of calculating and measuring to applications in different fields in which evapotranspiration is an important factor The book will be of benefit to scientists engineers and managers involved in problems related to meteorology climatology hydrology geography agronomy and agricultural water management We hope they will find useful material in this collection of papers [Hydrology of Disasters](#) V.P. Singh,2012-12-06 The General Assembly of the United Nations passed a resolution on December 11 1987 designating the 1990s as the International Decade for Natural Disaster Reduction This resolution has served as a catalyst in promotion of international cooperation in the field of natural disaster reduction in initiation of wide ranging research activities on natural and man made disasters in

development of technologies for assessment prediction prevention and mitigation through technical assistance technology transfer demonstration projects and education and training and in dissemination of information related to measures for assessment prediction prevention and mitigation of natural disasters Disasters are manifestations of environmental extremes Depending upon the type of disasters their occurrence may have short term and/or long term detrimental environmental consequences Disasters cannot be prevented altogether but their impact can be mitigated This book is an attempt to provide a discussion of hydrological aspects of the various types of natural disasters It is hoped that others will be stimulated to write more comprehensive texts on this subject of enormous importance
