*Science Talk* Daniel Patrick Thurs, 2007 Science news is met by the public with a mixture of fascination and disengagement On the one hand Americans are inflamed by topics ranging from the question of whether or not Pluto is a planet to the ethics of stem cell research But the complexity of scientific research can also be confusing and overwhelming causing many to divert their attentions elsewhere and leave science to the experts Whether they follow science news closely or not Americans take for granted that discoveries in the sciences are occurring constantly Few however stop to consider how these advances and the debates they sometimes lead to contribute to the changing definition of the term science itself Going beyond the issue centered debates Daniel Patrick Thurs examines what these controversies say about how we understand science now and in the future Drawing on his analysis of magazines newspapers journals and other forms of public discourse Thurs describes how science originally used as a synonym for general knowledge became a term to distinguish particular subjects as elite forms of study accessible only to the highly educated

**Rioting in America** Paul A. Gilje, 1999-03-22 a sweeping analytical synthesis of collective violence from the colonial experience to the present American Studies Gilje has written the book on rioting throughout American history The Historian a thorough illuminating and at times harrowing account of man's inhumanity to man William and Mary Quarterly fulfills its title's promise as an encyclopedic study an impressive accomplishment and required reading for anyone interested in America's contentious past Journal of the Early Republic Gilje has written a thought provoking survey of the social context of American riots and popular disorders from the Colonial period to the late 20th century a must read for anyone interested in riots Choice In this wide ranging survey of rioting in America Paul A Gilje argues that we cannot fully comprehend the history of the United States without an understanding of the impact of rioting Exploring the rationale of the American mob brings to light the grievances that motivate its behavior and the historical circumstances that drive the choices it makes Gilje's unusual lens makes for an eye opening view of the American people and their history

**The Monthly Evening Sky Map**, 1930 **The Review of Popular Astronomy**, 1928 The Relativity Riot Gam Klutier, 2003 A poetic autobiographical novel filled with vivid painterly images it is the story of an artist's journey towards a mystical way of living *The Statistical Method in Economics and Political Science; a Treatise on the Quantitative and Institutional Approach to Social and Industrial Problems* Philip Sargant Florence, 1929 **The Month**, 1921 **Theory in Anthropology** Robert A. Manners, David Kaplan, 2013-11-05 This is VII in a series of ten volumes on the Theory in Anthropology Originally published in 1968 this is a sourcebook that was created by the authors need for making accessible in a single volume a sample of those important pieces which are presently scattered in numerous publications some of which are difficult for the student to obtain Our second reason had to do with certain convictions they hold about the aims and methods of anthropology Race Riot, Detroit 1943 Norman Daymond Humphrey, 1968 Based upon the author's own first hand observations of the 1943 Detroit race riots Acknowledgements

**Science in Popular Culture** Daniel Patrick Thurs,2004 The meaning of science has varied considerably over the last several centuries It has now become an important and powerful word But the evolution of depictions of science has not been explored in detail When did now familiar notions such as a unique scientific method or a special community of scientists come to be associated with science What did the spread of these terms say about the ways in which people thought about science How did discussion of the relationship between science and other categories of knowledge change and how did such changes shape the importance of being scientific To answer these questions I examine popular depictions of science during a number of important nineteenth and twentieth century scientific controversies namely those over phrenology evolution relativity and UFOs My concern is with the American context and particularly with those aspects of discussion and debate that occurred in magazines and books intended for general readers

**Anthropological Theory** Robert Alan Manners,David Kaplan, Anthropological theory has been much discussed in recent years yet the crucial questions still remain how can it be defined how is it developed how is it to be applied and how can one confirm it The editors of Anthropological Theory answer these questions by presenting essays relating to various aspects of anthropological theory Their selections from widely scattered and often difficult to obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory The development of field work in anthropology generated a tremendous emphasis on empirical data and research The plethora of information awaiting collection and the enthusiasm with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline Therefore they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology Essays by anthropologists and other social scientists deal with explanation evolution ecology ideology structuralism and a number of other issues reflecting throughout the editors conviction that anthropology is a science the goal of which is to produce generalizations about sociocultural phenomena The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist Robert A Manners 1913 1996 received his Ph D from Columbia University and carried on field work in the Caribbean among American Indians in the Southwest and in East Africa He wrote numerous articles and reviews for anthropological journals as well as many books He was professor of anthropology Brandeis University where he started up the department David Kaplan is professor emeritus of anthropology at Brandeis University He has contributed articles and reviews to various journals He has also done field work in Mexico and his areas of specialty include economic anthropology method and theory and peasant culture of Mesoamerica [Mental Health Services to Victims of Community Violence](#) World Federation for Mental Health. performance and transformation of identity this volume addresses representations of travel mobility and migration in 19th 21st century travel writing literature and media texts In so doing the book analyses the role of the various cultural ethnic gender and national encounters pertinent to narratives of travel and migration in transforming and problematizing the identities of both the travelers and travelees enacting in the borderzones between cultures While the individual essays by scholars from a wide range of countries deal with a variety of case studies from various historical spatial and cultural locations they share a strong central interest in the ways in which the narratives of travel contribute to the imagining of ethnic encounters and how they have acted as sites of transformation and transculturation from the early nineteenth century to the present day In addition to discussing textual representations of travel and migration the volume also addresses the ways in which cultural texts themselves travel and are reconstructed in various cultural settings The analyses are particularly attentive to the issues of globalization and migration which provide a general frame for interpretation What distinguishes the volume from existing books is its concern with travel and migration as ways of forging transcultural identities that are able to subvert existing categorizations and binary models of identity formation In so doing it pays particular attention to the performance of identity in various spaces of cultural encounter ranging from North America to the East of Europe putting particular emphasis on the representation of intercultural and ethnic encounters
