Planning Sustainable Cities Un-Habitat,2016-05-13 Current urban planning systems are not equipped to deal with the major urban challenges of the twenty first century including effects of climate change resource depletion and economic instability plus continued rapid urbanization with its negative consequences such as poverty slums and urban informality These planning systems have also to a large extent failed to meaningfully involve and accommodate the ways of life of communities and other stakeholders in the planning of urban areas thus contributing to the problems of spatial marginalization and exclusion It is clear that urban planning needs to be reconsidered and revitalized for a sustainable urban future *Planning Sustainable Cities* reviews the major challenges currently facing cities and towns all over the world the emergence and spread of modern urban planning and the effectiveness of current approaches More importantly it identifies innovative urban planning approaches and practices that are more responsive to current and future challenges of urbanization The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends It is an essential reference for researchers academics public authorities and civil society organizations all over the world Preceding issues of the report have addressed such topics as **Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter and Enhancing Urban Safety and Security** **Resources in Education** ,1975 **Planning for Natural Resources** ,2002 *Saving America's Countryside* Samuel N. Countryside was the first and is still the only comprehensive step by step guide to protecting the natural historic scenic and agricultural resources of a rural community The authors show how to organize a conservation effort inventory available resources pass effective new laws set up land trusts take advantage of federal programs and change public attitudes The thoroughly revised and updated second edition reports on changes in conservation over the past eight years and adds a chapter on making economic development compatible with rural conservation It includes new case studies more than fifty new illustrations and a section on heritage tourism As in the previous edition the detailed case studies document a variety of successful and often surprisingly innovative conservation efforts by residents of rural communities throughout the United States
