Plant Operators Forum:

Plant Operators' Forum Doug N. Halbe, 1998 *SME Mineral Processing and Extractive Metallurgy Handbook*
Courtney A. Young, 2019-02-01 This landmark publication distills the body of knowledge that characterizes mineral processing and extractive metallurgy as disciplinary fields. It will inspire and inform current and future generations of minerals and metallurgy professionals. Mineral processing and extractive metallurgy are atypical disciplines requiring a combination of knowledge, experience, and art. Investing in this trove of valuable information is a must for all those involved in the industry: students, engineers, mill managers, and operators. More than 192 internationally recognized experts have contributed to the handbook's 128 thought-provoking chapters that examine nearly every aspect of mineral processing and extractive metallurgy. This inclusive reference addresses the magnitude of traditional industry topics and also addresses the new technologies and important cultural and social issues that are important today.

Contents: Mineral Characterization and Analysis, Management and Reporting, Comminution, Classification and Washing, Transport and Storage, Physical Separations, Flotation, Solid and Liquid Separation, Disposal, Hydrometallurgy, Pyrometallurgy, Processing of Selected Metals, Minerals and Materials.

Recent Advances in Mineral Processing Plant Design Deepak Malhotra, 2009. A compilation of engaging and insightful papers from the prestigious 2009 Plant Design Symposium, the volume is a sequel to *Mineral Processing Plant Design: Practice and Control*, an industry standard published in 2002. Both books are indispensable texts for university-level instruction as well as valuable guides for operators considering new construction, plant renovation, or expansion. You will learn the role of innovation, how to finance and conduct feasibility studies, and how to reduce your plant's carbon footprint.

Because the program was developed to benefit the operators, we go beyond industry jargon and explore topics such as *How the Mine Department Lies About Production* and *How the Metallurgist Catches Them*.
