Reproductive Technologies,
and the Family**

Reproduction Revolution

E Durkheim

Reproduction Revolution:

The Reproduction Revolution Peter Singer, Deane Wells, 1984 **The Reproduction Revolution** John Frederic Kilner, Paige Comstock Cunningham, William David Hager, 2000 A challenging look at today's most hotly debated issues in bioethics Within the high paced highly controverted field of bioethics the most hotly debated issues center on sexuality reproductive technology and the family This new volume from the Center for Bioethics and Human Dignity provides a thought provoking appraisal of the ethical dimension of the reproductive revolution from a Christian perspective Thirty scholars and medical practitioners discuss some of the most pressing topics related to human reproduction including the moral status of embryos the use of donor eggs and sperm surrogate motherhood and human cloning the abortifacient effect of birth control pills *Making Babies: Biomedical Technologies, Reproductive Ethics, and Public Policy* Inmaculada de Melo-Martín, 2013-03-09 Each year roughly a million new cases of cancer appear in the US and more than 500 000 Americans die annually of premature death Although medical progress has slowed cancer mortality its incidence is increasing roughly six times faster than cancer mortality is decreasing Breast cancer in particular has been increasing about one percent each year since 1973 At least two of the factors responsible for this surge in breast cancer are women's use of medically prescribed synthetic hormones and the exposure of the entire population to chemicals such as dioxin Both exposures increase the likelihood of breast cancer Although many ethicists worry about involuntary societal imposition of chemicals such as dioxin through industrial and agricultural processes allegedly voluntary exposures also constitute both a public health problem and a biomedical ethics difficulty Physicians recommend synthetic hormones for example to women who apparently take them voluntarily In the case of in vitro fertilization doctors prescribe hormones to induce egg production and to increase the chances of reproduction for couples who are unable to have children Despite the benefits of medical technologies such as hormone stimulation and in vitro fertilization they also carry great risks The price that childless women pay for their opportunity to have children through in vitro fertilization may be their own increased risk of diseases such as breast cancer that are hormone dependent *Assisted Human Reproduction* Dani Singer, Myra Hunter, 2006-02-22 With contributions from Eric Blyth Ken Daniels Julia Feast Robert Lee Nina Martin Alexina McWhinnie Derek Morgan Clare Murray Sharon Pettle Claire Potter Jim Richards and Françoise Shenfield The separation of procreation from conception has broadened notions of parenthood and created novel dilemmas A woman may carry a foetus derived from gametes neither or only one of which came from her or her partner or she may carry a foetus created using in vitro fertilisation IVF with the purpose of handing it to two other parents one neither or both of whom may be genetically related to the prospective child Parents may consist of single sex couples only one of them genetically related to the child the prospective mother may be past her menopause and genetic parenthood after death is now achievable In a world increasingly reliant on medical science how can the argument that equates traditional with natural and novel with unnatural unethical be justified Should there be legislation

which is notoriously slow to change in a field driven by dazzling new possibilities at ever faster rate particularly when restrictions differ from country to country so that those who can afford it travel elsewhere for their treatment of choice Whose rights are paramount the adults hoping to build a family or the prospective child ren s future well being On what basis can apparently competing rights be regulated or adjudicated and how and to what extent can these be enforced in practice

Inconceivable Conceptions Jane Haynes,Juliet Miller,2004-03-01 It is over two decades since the first test tube baby was born During this period a new belief that all infertile women can now have babies has become widely accepted indeed infertile couples may feel great pressure to seek a medical solution However the psychological and social effects of the changing experiences of infertility remain confusing both for those who experience infertility and for wider society In this book a distinguished range of contributors including novelist Hilary Mantel and Germaine Greer examine the experience of infertility from both male and female perspectives the psychological aspects of infertility diagnosis and treatment and the often radical and unexpected effects on kinship Drawing from a wide range of theoretical backgrounds including Jungian analytical and compelling personal reflections this book aims to unravel the implications of advancing reproductive technology for our understanding of ourselves and our families

Catalog of Copyright Entries Library of Congress. Copyright Office,1977

Routledge Library Editions: Feminist Theory Various,2021-04-28 Routledge Library Editions Feminist Theory brings together as one set or individual volumes a series of previously out of print classics from a variety of academic imprints With titles ranging from *The Liberation of Women* to *Feminists and State Welfare* from *Married to the Job* to *Julia Kristeva* this set provides in one place a wealth of important reference sources from the diverse field of gender studies

Good Sex Raymond A. Belliotti,1993 Rules about sexuality written and unwritten have existed in every culture as have disagreements over what is and isn t acceptable Must morally permissible sex have only one function Must it be heterosexual Must it occur within the confines of the institution of marriage Must it be accompanied by requisite emotions such as love and intimacy

Special Report ,2006

Adoption and Assisted Reproduction Madelyn Freundlich,2001 The controversies in adoption have extended across a spectrum of policy and practice issues and although the issues have become clear resolution has not been achieved nor has consensus developed regarding a framework on which to improve the quality of adoption policy and practice This book is the fourth in a series to use an ethics based framework for analyzing and resolving these complex challenges in adoption while avoiding the divisiveness that has heretofore impeded their resolution This book raises the question of whether assisted reproduction including sperm donation egg donation and embryo transfer which may result in a child who is not genetically related to one or both parents creates a situation that is analogous to adoption The book examines whether the knowledge acquired in the field of adoption should be applied in the area of assisted reproduction and whether issues in adoption such as identity access to background information and search are equally applicable in the context of reproductive technology The chapters are 1 Infertility Assisted Reproduction and

Adoption 2 The Meaning of Parenthood in Assisted Reproduction and Adoption 3 The Parties Served through Adoption and Assisted Reproduction 4 Anonymity and Information Access 5 Market Forces in Adoption and Assisted Reproduction 6 Embryo Donation and Adoption and 7 The Law of Adoption and Assisted Reproduction The concluding chapter notes that the limited research in assisted reproduction has made it difficult to determine the relative risks and benefits of a number of aspects of current practice and that identifying the key issues can serve as a first step toward full discussion of the challenges faced by professionals in adoption and assisted reproduction Contains 181 references KB Socialism & Education Takawira C. Gwarinda,1985 **The Journal of American History** ,1914 *Good Housekeeping* ,1929 **Law and Bioethics** Michael D. A. Freeman,2008 Current Legal Issues like its sister volume Current Legal Problems is based upon an annual colloquium held at University College London Each year leading scholars from around the world gather to discuss the relationship between law and another discipline of thought Each colloquium examines how the external discipline is conceived in legal thought and argument how the law is pictured in that discipline and analyses points of controversy in the use and abuse of extra legal arguments within legal theory and practice Law and Bioethics the latest volume in the Current Legal Issues series contains a broad range of essays by scholars interested in the interactions between law and bioethics It includes studies examining the regulation of stem cell research human rights and bioethics the regulation of reproductive technologies and distributive justice in healthcare and pandemic planning **Crucible** ,2006 Historical Outlook ,1925 **Issues in Reproductive and Genetic Engineering** ,1990 Electrochemical and Metallurgical Industry Eugene Franz Roeber,Howard Coon Parmelee,1907 **Nature** Sir Norman Lockyer,1921 **New Society** ,1984

Uncover the mysteries within its enigmatic creation, Discover the Intrigue in **Reproduction Revolution** . This downloadable ebook, shrouded in suspense, is available in a PDF format (Download in PDF: *). Dive into a world of uncertainty and anticipation. Download now to unravel the secrets hidden within the pages.
