Research in Family Interaction Antonio J. Ferreira, William D. Winter, 1971 Research in Family Interaction William D. Winter, 1969 Sourcebook of Family Theories and Methods Pauline Boss, William J. Doherty, Ralph LaRossa, Walter R. Schumm, Suzanne K. Steinmetz, 2008-11-19

Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production

Marketing research students starting with this book or one written on the same model would be better able to master the more detailed and comprehensive material in the basic marketing research text

Journal of Marketing Research A long history of research on the family has led to ever more sophisticated methods for studying this unique social institution Yet few family researchers have attempted to synthesize the methodological techniques used for students of family science Brent Miller s concise book Family Research Methods does just that Miller describes the entire research process from research design through data collection sampling and data analysis to explain to graduates and undergraduates alike just how family research is done While many of the methods are shared with the other social sciences Miller s work highlights specific family techniques and demonstrates family related applications This brief volume can be used to introduce students in family fields to the research process or to supplement more traditional methods textbooks by providing a family focus

Advances in Family Intervention, Assessment and Theory ,1987 Family Health Indicators Jean T. May, 1974 1024 references 344 with abstracts based on analyses of the family as a collective unit A multi resource multi disciplinary approach was used in the compilation of the bibliographic materials reviewed in the development of this research Includes some foreign language literature Arranged alphabetically by authors Topical index

Resources in Education ,1986 Encyclopedia of Case Study Research Albert J. Mills, Gabrielle Durepos, Elden Wiebe, 2009-10-21

Case study research has a long history within the natural sciences social sciences and humanities dating back to the early 1920 s At first it was a useful way for researchers to make valid inferences from events outside the laboratory in ways consistent with the rigorous practices of investigation inside the lab Over time case study approaches garnered interest in

multiple disciplines as scholars studied phenomena in context Despite widespread use case study research has received little attention among the literature on research strategies The Encyclopedia of Case Study Research provides a compendium on the important methodological issues in conducting case study research and explores both the strengths and weaknesses of different paradigmatic approaches These two volumes focus on the distinctive characteristics of case study research and its place within and alongside other research methodologies Key Features Presents a definition of case study research that can be used in different fields of study Describes case study as a research strategy rather than as a single tool for decision making and inquiry Guides rather than dictates readers understanding and applications of case study research Includes a critical summary in each entry which raises additional matters for reflection Makes case study relevant to researchers at various stages of their careers across philosophic divides and throughout diverse disciplines Key Themes Academic Disciplines Case Study Research Design Conceptual Issues Data Analysis Data Collection Methodological Approaches Theoretical Traditions Theory Development and Contributions From Case Study Research Types of Case Study Research
