Research Strategies:

Research Strategies: Finding Your Way Through the Information Fog William Badke, 2021-03-02 Everyone does research. Some just do it better than others. In this chaotic world of information and misinformation referred to as information fog, university students in particular need to learn how to conduct research effectively. Good research is about a quest to discover more about a burning desire to solve society's problems and make a better world. Ultimately, research is a way forward to a resolution of life's greatest difficulties. In this seventh edition of *Research Strategies: Finding Your Way through the Information Fog*, author William Badke walks you step by step through the entire research process, from choosing a topic to writing the final project and everything in between. A seasoned researcher and educator, Badke offers tried and true tips, tricks, and strategies to help you identify a problem, acquire pertinent information, and use that information to address the problem. Employing a host of examples and humor, *Research Strategies: Finding Your Way through the Information Fog* shows how research can be exciting and fun.

Research Strategies William B. Badke, 2008. Welcome to the information fog. Taking charge. Database searching with keywords and hierarchies. Metadata and the power of controlled vocabularies. Library catalogs and journal databases. Internet research. Other resources and case studies in research. Learning how to read for research. Organizing your resources to write your paper. Tips on research writing. [Handbook of Qualitative Research Methods in Entrepreneurship](#) Helle Neergaard, John P. Uhløi, 2007. The *Handbook of Qualitative Research Methods in Entrepreneurship* is an important contribution to the field and should be referenced in any paper using qualitative methodologies to investigate the entrepreneurial phenomenon. Craig S. Galbraith, *Journal of Enterprising Communities*. There is no hiding behind the ramparts of dry scholarship here. The credibility of the theory being spoken of is not the stuff of constructed proofs but alignments of critical insight and utility. This is where qualitative work can make a difference to the field and where this book makes its mark. Robin Holt, *International Journal of Entrepreneurial Behaviour and Research*. The *Handbook of Qualitative Research Methods in Entrepreneurship* is an unusually solid and multifaceted book on what qualitative methods have done, are doing, and will do in entrepreneurship research. Every serious entrepreneurship scholar should read it. It points at the future. Björn Bjerke, University of Kalmar, Sweden. I would warmly recommend this unique collection of qualitative methods of entrepreneurship research to both mature and beginning researchers as a menu to choose from for their planned empirical studies. For those who try to get away from only quantitative studies in both business practice and academic research, this book is their chance to find a rich inspiration in reflecting on entrepreneurship as a lived experience using grounded theory and ethnographic discourse and narrative approaches. It might convince editors of top journals of entrepreneurship research to welcome qualitative research submissions as an indispensable complement to quantitative-only submissions. This domain is not physics. In bringing together such a variety of experts from so many nationalities in this *Handbook*, our Danish colleagues are making entrepreneurship research a realistic global venture. Jan

Uljn Eindhoven University of Technology The Netherlands Helle Neergaard and John Parm Ulh i have compiled a remarkable collection of work that both represents the range of methods and demonstrates the depth of insight that can be achieved through qualitative approaches This book is not simply a handbook of qualitative research methods though it well achieves this aim it is also an important contribution towards the field of entrepreneurship research From the Foreword by Sara Carter This expansive and practical Handbook introduces the methods currently used to increase the understanding of the usefulness and versatility of a systematic approach to qualitative research in entrepreneurship It fills a crucial gap in the literature on entrepreneurship theory and just as importantly illustrates how these principles and techniques can be appropriately and fruitfully employed The Handbook is underpinned by the belief that qualitative research has the potential to charter hitherto unexplored waters in the field of entrepreneurship and thus contribute significantly to its further advancement The contributors seek to assist entrepreneurship researchers in making more informed choices and designing more rigorous and sophisticated studies They achieve this by providing concrete examples of research experiences and tangible how to advice By clarifying what these research methods entail how they are currently being used and how they can be evaluated this Handbook constitutes a comprehensive and highly accessible methodological toolbox Dealing with both well accepted qualitative approaches and lesser known rarer and more novel approaches to the study of entrepreneurship this Handbook will be invaluable to those studying researching and teaching entrepreneurship

The Politicizing Presidency Thomas J. Weko, 1995 From Truman to Clinton presidents have aggressively tried to expand their control over national government In the process they have vastly enlarged their White House staffs and politicized the federal bureaucracy with thousands of appointees in key administrative positions Thomas Weko argues that the Presidential Personnel Office PPO charged with screening and recommending such appointees both exemplifies and helps explain the enormous growth of presidential power since World War II Originally conceived as a small advisory group within the White House Office the PPO has grown enormously from a staff of two under Truman to as many as sixty under other presidents and now oversees nearly

four thousand appointments per administration Weko charts the PPO s evolution and influence and shows how central it is to our understanding of modern presidential leadership Weko s starting point is Terry Moe s rational choice theory that it is the institution of the presidency not the sitting president that fosters centralization and politicization within the executive branch Amplifying and extending Moe s theory Weko persuasively links the PPO s explosive growth to the weakening of political parties the post Eisenhower disintegration of policy networks the growing impact of television news and the public s increasing readiness to hold the President accountable for policy failures The PPO s growth clearly has increased presidential control and bureaucratic responsiveness But Weko argues those results have had unanticipated and unwanted consequences that among other things have undermined the integrity and capabilities of administrative agencies Any improvement in the leadership of the executive branch he contends can only emerge from changes in the current institutional arrangement of the presidency itself Based on exhaustive research in White House files oral histories and memoirs and personal interviews with over 100 White House aides Weko s study provides a provocative new look at the White House Office and the modern presidency

Funding Public Schools Kenneth K. Wong,1999 This book examines the fundamental role of politics in funding our public schools and fills a conceptual imbalance in the current literature in school finance and educational policy Unlike those who are primarily concerned about cost efficiency Kenneth Wong specifies how resources are allocated for what purposes at different levels of the government In contrast to those who focus on litigation as a way to reduce funding gaps he underscores institutional stalemate and the lack of political will to act as important factors that affect legislative deadlock in school finance reform Wong defines how politics has sustained various types of rules that affect the allocation of resources at the federal state and local level While these rules have been remarkably stable over the past twenty to thirty years they have often worked at cross purposes by fragmenting policy and constraining the education process at schools with the greatest needs Wong s examination is shaped by several questions How do these rules come about What role does politics play in retention of the rules Do the federal state and local governments espouse different policies In what ways do these policies operate at cross purposes How do they affect educational opportunities Do the policies cohere in ways that promote better and more equitable student outcomes Wong concludes that the five types of entrenched rules for resource allocation are rooted in existing governance arrangements and seemingly impervious to partisan shifts interest group pressures and constitutional challenge And because these rules foster policy fragmentation and embody initiatives out of step with the performance based reform agenda of the 1990s the outlook for positive change in public education is uncertain unless fairly radical approaches are employed Wong also analyzes four allocative reform models two based on the assumption that existing political

structures are unlikely to change and two that seek to empower actors at the school level. The two models for systemwide restructuring aimed at intergovernmental coordination and/or integrated governance would seek to clarify responsibilities for public education among federal, state, and local authorities, while all integrating political and educational accountability. The other two models identified by Wong shift control from state and district to the school: one based on local leadership and the other based on market forces. In discussing the guiding principles of the four models, Wong takes care to identify both the potential and limitations of each. Written with a broad policy audience in mind, Wong's book should appeal to professionals interested in the politics of educational reform and to teachers of courses dealing with educational policy and administration and intergovernmental relations.
