## Plasticizers Database:

**Plasticizers Database** Anna Wypych,2012-11-30 The plasticizer database was developed to contain data required in plasticizers application Attempts were made to include large number of plasticizers used in various sectors of industry to provide information for all users and to help in finding new solutions and formulations Plasticizers included in the database can be divided into two categories generic chemical name compounds and commercial plasticizers which are either mixtures of several components industrial grades of particular compound polymeric materials or products having unknown complex composition The database contains solvents representing all chemical groups of materials which considered as plasticizers In most cases plasticizers differ from solvents by boiling point which is above 250oC but some plasticizers are used as temporary plasticizers or are expect to react with other components of mixture These substances will not meet the boiling temperature standard but will still be included since they play role of plasticizers The large number of the plasticizers and the data fields makes this database the most comprehensive database on plasticizers ever available in any source Completely updated to reflect substantial changes in the plasticizer market Over 200 new plasticizers added Divided into sections for ease of use *Plasticizers Database [electronic Resource]* Anna Wypych,2004 [Handbook of Plasticizers](#) George Wypych,2023-02-08 Handbook of Plasticizers Fourth Edition provides a comprehensive review of the current literature as well as cutting edge details on plasticizers obtained from renewable resources The book specifies the typical properties of plasticizers belonging to one of thirty one groups including expected properties in a given group The mechanisms of plasticizers plasticization production steps and their material behavior in plasticized systems are outlined along with theoretical background to help readers understand practical observations and methods of material improvement Other chapters cover the effects on the physical and mechanical properties of plasticized materials their use in polymers processing defects formation and more This is an essential professional reference providing R D scientists production chemists and engineers the information they need to avoid certain plasticizers in applications where they may cause health or material durability problems In addition the book shows readers how and where to use plasticizers more effectively Provides detailed coverage of thirty one groups of plasticizers covering their properties production processing applications health and environmental aspects Contains new material on odors in plastic materials and their removal Includes expanded coverage of plasticizers from renewable resources [Databook of Plasticizers](#) Anna Wypych,2017-01-12 Databook of Plasticizers Second Edition contains data on the most important plasticizers in use today including over 375 generic and commercial plasticizers The data comes from a range of sources beyond plasticizers manufacturers allowing for a detailed comparison of properties between different plasticizers Over 100 different data fields are provided from general information such as molecular structure and formula to physical properties health and safety information ecological properties and recommendations regarding appropriate use and performance of each plasticizer The databook is an essential resource for engineers

technicians and materials scientists responsible for specifying a plasticizer It provides trustworthy and up to date data that is applicable to a range of numerous application areas such as construction automotives food packaging and more Enables plastics practitioners to more efficiently select the correct plasticizer for a range of applications Includes 100 data fields for each plasticizer including physical properties health and safety information ecological properties and specific usage recommendations Contains data on the most important plasticizers currently in use both commercial products and the chemical compounds used for the manufacture of plasticizers
