Study On International Politics In Contemporary China Yuyan Zhang, 2020-07-14 China s guiding principle for foreign relations and its

focus on states and regions has shifted a lot from the first 30 years of the founding of the People's Republic of China PRC in 1949 to 1978 and beyond after reform and opening up. However, PRC's diplomatic practice has been continuous, whether it was participation in the Korean War, breaking up with the former Soviet Union after a honeymoon period, China's self-defense war over Sino-Indian border, participation in the Vietnam War, breakthrough in the Sino-US relation, or PRC's self-defense war over the Sino-Vietnamese border. These historical events brought the need for theoretical study in International Politics. IP. The development of China's IP research was slow and filled with complications, but it signified a breakthrough from scratch. This book has filled the gap by depicting a complete scroll of China's IP research in over 60 years since 1949. This book has followed two principles: one is according to the classification of the IP discipline, and the other is to recommend adaptations according to China's actual conditions. **Methodological Issues in Accounting Research** Zahirul Hoque, 2006

Toward a Taxonomy of Historical Research Methods in Accounting Michael John Renny Gaffikin, 1980 *Inside Accounting* David Leung, 2016-05-23. Based on a study covering a one-year financial reporting cycle at a commercial subsidiary of a well-known scientific research organization, *Inside Accounting* examines how accountants and non-accounting managers construct their company's earnings. Addressing issues in both internal management accounting, such as budgeting, performance evaluation, and control, as well as external financial accounting, such as book-keeping, monthly year-end accounts, and auditing, David Leung focuses on how people classify transactions, make professional judgments, and use computer software for accounting and prepare for and facilitate the auditing process. He also looks at accountancy training and the impact of people's affiliations to the accounting profession or other professions on their accounting and on their perceptions of financial statements. Other contingent or contextual factors that influence the choice of accounting method, such as time pressure, reward structures, management authority, and institutions, are also considered. David Leung's research employs an innovative blend of theory and practice that redresses the imbalance between ethnographic studies of financial accounting and management accounting and helps close the gap between the academic curriculum and the experiences of practitioners. His research leads the author to conclude that no act of accounting classification is ever indefeasibly correct; that the accounting community's institutions and authority are central to the accounting process and to the truth and fairness of accounting numbers; that accounting training involves extensive use of learning by doing; and that both accountants and non-accounting managers have goals and interests that often result in no better than good-enough accounting. This book will appeal to accounting and finance professionals and academics in finance, as well as to sociologists and academic researchers interested in research methods and science studies. *The Accountant*, 1926 *Qualitative Methods for Accounting and Management* Mark Saunders, Philip Lewis, Adrian Thornhill, 2009 **Accounting Research Methods and Research Fields** Musbau Kolawole Kayode, 2015-09-28.
