De-centring Land Grabbing Peter Vandergeest, Laura Schoenberger, 2019-10-23 Southeast Asia has been portrayed as a key site in the global land grab Featuring leading scholars in the field this collection critically examines the nature and extent of land grabbing in Southeast Asia and seeks to locate this phenomena in broader

agrarian and environmental transitions AET The individual contributions suggest that there is little evidence of a global land grab in Southeast Asia but that over the last ten years the surge of plantations and processes of land grabbing has been a key feature in the region The collection considers how broader AET processes may be brought more clearly into focus by decentring land grabbing including consideration of its absence as well presence The diversity of cases in this collection coalesces around the productive tension in land grab studies between global capitalist processes on the one hand and context specificity and contingent motivations fuelling the expansion of large scale plantations for oil palm rubber cassava and other cash crops on the other hand The contributors further broaden the entry points to consider cross sectoral AET processes such as enclosures for mining conservation and hydropower and explore the contingencies that help to maintain smallholder production The chapters originally published as a special issue in *The Journal of Peasant Studies* *Palm Programming* Neil Rhodes, Julie McKeenan, 1999 Endorsed by Palm as their official developer s guide this tutorial style book shows intermediate to experienced C programmers how to build a Palm application from the ground up Includes a CD ROM with source code and third party developer tools California.
