

# What Is a Paradox? Definition, Examples & How To Use It

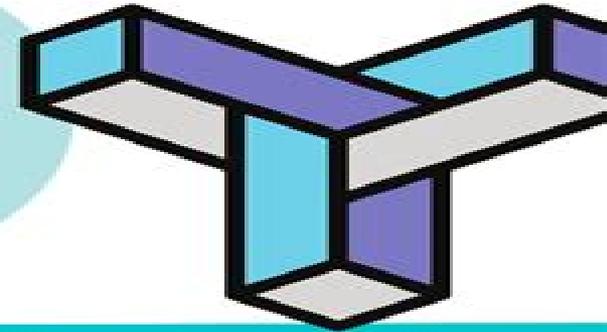

## 1. What Is a Paradox?

A paradox is a statement that contradicts itself. For example, the statement "I am not lying" is a paradox because it means one cannot be telling the truth while saying they are not lying. The word derives from two Greek words meaning "contrary to belief".

## 2. First Known Use Of Paradox

The first known use of the word paradox is from Plato in his dialogue, Cratylus. In this dialogue, Plato discusses the origins of words and how they are tied into their meanings. He explains that a paradox is "something said which seems contrary to common sense and yet might be true." When you think about it, this definition makes perfect sense.

## 3. Logical Paradox

Logical paradoxes typically arise because there is an underlying assumption being made that turns out not to be true or because it's been assumed that one rule applies without considering other possible exceptions.
