Mab Extinctions:

The Road to Extinction Richard Fitter, Maisie Fitter, 1987 *Encyclopedia of Ecology and Environmental Management*, 2009-07-15 The Encyclopedia of Ecology and Environmental Management addresses the core definitions and issues in pure and applied ecology. It is neither a short entry dictionary nor a long entry encyclopedia but lies somewhere in between. The mixture of short entry definitions and long entry essays gives a comprehensive and up to date alphabetical guide to over 3000 topics and allows any subject to be accessed to varying levels of detail while the longer entries provide general reviews of subjects. The short definitions provide specific details on more specialised areas. An important feature of the Encyclopedia which sets it apart from other similar works is the comprehensive cross referencing. The most comprehensive and up to date reference work in pure and applied ecology. Definitions cover the entire spectrum of pure and applied ecological research. Distinguished editorial board: Dr Peter Moore, Professor John Grace, Professor Bryan Shorrocks, Professor Steven Stearns, Professor Don Falk. International team of distinguished authors over 200 contributors from 20 countries. 3000 headwords defined. Over 250 long entries review major topics. Heavily illustrated with a section of colour plates. Complete one volume guide to pure and applied ecology. Presents cutting edge definitions in emerging fields as well as grounding in well established areas of ecology. *Blackwell's Concise Encyclopedia of Ecology* Peter P. Calow, 2009-04-01 The language of ecology has grown rapidly and changed extensively over the last decade. From Arrhenotoky to Psammosere from the One tailed test to Zoocoenosis the Blackwell Concise Encyclopedia of Ecology provides concise non technical definitions of over 2000 ecological terms covering the complete spectrum of pure and applied ecological research. The definitions are drawn from the Encyclopedia of Ecology and Environmental Management and are fully cross referenced. This is the most comprehensive and up to date dictionary of ecological terms available. It should be invaluable to students and researchers alike. Over 2000 terms defined. Avoids technical jargon. Fully cross referenced. Includes common abbreviations. **Against Extinction** William (Bill) Adams, 2013-06-17 Conservation in the 21st century needs to be different and this book is a good indicator of why. Bulletin of British Ecological Society. *Against Extinction* tells the history of wildlife conservation from its roots in the 19th century through the foundation of the Society for the Preservation of the Wild Fauna of the Empire in London in 1903 to the huge and diverse international movement of the present day. It vividly portrays conservation's legacy of big game hunting, the battles for the establishment of national parks, the global importance of species conservation and debates over the sustainable use of and trade in wildlife. Bill Adams addresses the big questions and ideas that have driven conservation for the last 100 years. How can the diversity of life be maintained as human demands on the Earth expand seemingly without limit? How can preservation be reconciled with human rights and the development needs of the poor? Is conservation something that can be imposed by a knowledgeable elite or is it something that should emerge naturally from people's free choices? These have never been easy questions and they are as important in the 21st century as at any time in
