How to be Good John Harris,2016-04-07 How to be Good is the pre eminent question for ethics although one that philosophers and ethicists seldom address head on Knowing how to be good or perhaps more modestly and more accurately knowing how to go about trying to be good and the ways in which it is pointless or self defeating to try to be good is of immense theoretical and practical importance And what goes for trying to be good oneself goes also for trying to provide others with ways of being good and for trying to make them good whether they like it or not This is what is meant by moral enhancement There are many proposed methodologies or technologies for moral enhancement Some of them are ancient and or familiar we may attempt moral enhancement by setting a good example by good parenting by education or training by peer pressure by telling stories with a moral in words or in pictures and so on We can imbibe substances with mood changing or motivational effects We can also use medical biological or other scientific means we can search for and deploy chemicals or biological or molecular agents which we believe will change people for the

better and we can modify the environment to make bad outcomes of all sorts less likely We can experiment with political and social systems institutions and arrangements designed to make the world a better place or people better people The question whether and to what extent moral enhancement is possible is the subject of this book **Los Angeles Magazine** ,2004-07
