Organizing Interests In Western Europe:

Organizing Interests in Western Europe Suzanne Berger, 1983-04-29 The chapters in this volume reconsider fundamental premises about state and society in advanced capitalist countries That social scientists in different disciplines of varying methodological and political persuasions should have found it useful to collaborate in such an undertaking is testimony to the profound social economic and political shocks experienced by all advanced capitalist nations since to late 1960s The energy crisis the end of rapid economic growth inflation high unemployment and rising social conflict challenge conventional conceptions about the functioning of industrial societies and their future course Social science theories have been unable to illuminate these realities ORGANIZING INTERESTS IN WESTERN EUROPE Suzanne Berger, 1981

Structuring Politics Sven Steinmo, Kathleen Thelen, Frank Longstreth, 1992-09-25 These essays demonstrate how the historical institutional approach to the study of politics reveals the nature of institutional change and its effect on policy making

Functional and Territorial Interest Representation in the EU Michèle Knodt, Christine Quittkat, Justin Greenwood, 2014-07-16 Despite a substantial legacy of literature on EU interest representation there is no systematic analysis available on whether a European model of interest representation in EU governance is detectable across functional and territorial categories of actors Functional actors include associations for business interests the professions and trade unions as well as NGOs and social movements territorial based entities include public actors such as regional and local government as well as actors primarily organised at territorial level What are the similarities and differences between territorial and functional based entities and are the similarities greater than the differences Are the differences sufficient to justify the use of different analytical tools Are the differences within these categories more significant than those across them Is there a professionalised European lobbying class across all actor types Does national embeddedness make a difference Which factors explain the success of actors to participate in European governance This book was originally published as special issue of Journal of European Integration

The West European Party System Peter Mair, 1990 The analysis of party systems in Western Europe has long constituted a major focus of concern in comparative political science Now for the first time many of the classic writings in this field have been collected into a single volume The collection contains seminal writings by Weber Neumann Duverger Kirchheimer Daalder Rokkan and Sartori as well as a selection from the more recent debates on changes in European party systems including the contributions of Pedersen Wolinetz and Inglehart The writings cover the development stabilization and transformation of party systems and include some of the key analyses which have sought to distinguish between different types of party systems

The Soviet Social Contract and why it Failed Linda J. Cook, 1993 This book is the first critical assessment of the likelihood and implications of such a contract Linda Cook pursues

the idea from Brezhnev's day to our own and considers the constraining effect it may have had on Gorbachev's attempts to liberalize the Soviet economy

Organized Interests and the European Community Justin Greenwood, 1992 The relationship between organized business and industrial interests and the internationalization of markets is explored in this volume A very topical expression of the internationalization of markets is the drive to create a single European market in the 1990s As this study demonstrates organized interests are playing a vital role in the process At the heart of understanding this process lies a recognition of two factors Firstly that interest associations are but one among a vast set of mechanisms of governance Secondly that interest associations are themselves diverse in levels domains territories and the size of their operations The book contains studies of key sectors particularly in high tech
