Colloquium, 1991 **Interplanetary Dust** Eberhard Grün, Bo A.S. Gustafson, Stan. Dermott, Hugo Fechtig, 2012-12-06 Conceived more than six years ago this book took much effort to develop and several updates in parts of the book became necessary because significant advances in the field of Interplanetary Dust had occurred Now at the beginning of the new millennium this book provides up to date coverage of all major aspects of dust in the Solar System The volume is conceived as a source book for researchers in the field as well as a graduate level textbook In order to achieve the highest standard the individual chapters are written by experts in the field preserving the somewhat different style and language of the sub topic The book follows the comprehensive review of the Cosmic Dust field assembled by Tony McDonnell more than 20 years ago That book covered dust in its various physical appearances as the common theme but it described phenomena that appeared rather unrelated The topics ranged from zodiacal light over lunar craters to dust

particles collected in the atmosphere from interstellar dust to comets and from dust dynamics to laboratory simulation of dusty phenomena *Extraterrestrial Dust* Kazuo Yamakoshi,1994 This monograph reports on the recent developments in the area of interplanetary and pre solar dust grains Chemical and isotope analyses of dust are discussed especially with the aim to study the origin and evolution of interplanetary dust Recent observations of extraterrestrial dust obtained with LDEF Galileo and Ulysses are presented Several velocity mechanisms for dust particles are discussed in addition to their impact on cosmic or cometary dust grain capture devices This volume is specially intended for research scientists and advanced graduate students in the fields of astronomy astrophysics and geo and cosmochemists Scientists in related fields like the environmental sciences especially researchers of artificial debris from rockets and boosters are also likely to be interested in this work *Symposium International Astronomical Union,1953* **Impacts and the Early Earth** Iain Gilmour,Christian Koeberl,2000-05-26 Only 10% of the 150 or so known impact craters on Earth date from the early Precambrian Era a time period covering some 88% of the Earth s history Yet this Era encompasses fundamental events in the origin and evolution of our planet from the origin of life itself to the development of continents The papers in this volume were presented at a workshop sponsored by the European Science Foundation Scientific Network on Impact cratering held in Cambridge UK in December 1998 The papers outline the present state of scientific understanding of the role impacts may have played in the biological and geological evolution of the Early Earth *Journal of the British Interplanetary Society* British Interplanetary Society,1999 Origins of Planets and Life H.
