[Catalog](#) ,2003 [Walks in & Around London](#) Peter Wenham,2003 This text explores the consequences for language acquisition language evolution and linguistic theory of taking the underlying architecture of the language faculty to be that of a dynamical system The authors investigate whether it is possible for a complex adaptive system to identify the categories structures and rules of a language given access only to instances of grammatical utterances of that language The linguistic tradition says that this is impossible but there is a growing body of literature in psychology and computer science arguing that grammar can be uncovered using purely statistical techniques applied to the distribution of forms in a string of words The book goes on to discuss whether a learner requires information about structure that goes beyond the information that is contained in the meaning Does the learner have to have knowledge of grammar per se prior to language acquisition as has been traditionally assumed **The Ridgeway** Neil Curtis,2001 This official guide contains precise route descriptions and Ordnance Survey maps marked with points of special interest background information on archaeology history wildlife and geology and details on public transportation and facilities
