Origin And Early Evolution Of Animals:

The Origin and Early Evolution of Animals Earl D. Hanson, 1977 *Origin and Early Evolution of the Metazoa* Jere H. Lipps, Philip W. Signor, 2013-11-21 Several years ago we realized that the most prominent ideas that had been expressed about the origin and early evolution of the Metazoa seemed to have been developed chiefly by zoologists using evidence from modern species without reference to the fossil record Paleontologists had in fact put forth their own ideas but the zoological and the paleontological evidence were about the problem seldom considered together especially by zoologists We believed that the paleontological documentation of the first Metazoa was too scattered too obscure to Western readers and much of it too recent to have been readily available to our colleagues in zoology Whether or not that was entirely true we thought that a single volume reviewing the fossil record of the earliest Metazoa would be useful to many in both paleontology and zoology especially since so much new information has been developed in the last few years Some of this information has been summarized in general articles recently but an overview of most of the field does not exist We therefore organized this book in five parts so that the evidence could be placed in perspective and summarized and inferences made from it Part I introduces the previous hypotheses that have been proposed for the origin and early radiation of Metazoa Part II consists of two summary chapters that set the sedimentological geochemical and biological background to the known radiations of Metazoa

The Hierarchy of Life Bo Fernholm, Kåre Bremer, Hans Jörnvall, 1989 The goal of the symposium on which these proceedings are based was to reach a consensus on the hierarchy of life In some well studied areas there is a good agreement between molecular data and morphology for example among vertebrates and insects In other well studied groups such as birds and bacteria fundamental disagreements reported in these proceedings may result from the use and interpretation of different methods All these points were discussed during the meeting and several problem areas were also identified resulting in new ideas and plans for future work in this field
