New Parallel Algorithms For Direct Solutions Of Linear Equations:

New Parallel Algorithms for Direct Solution of Linear Equations C. Siva Ram Murthy, K. N. Balasubramanya Murthy, Srinivas Aluru, 2000-10-30 Rather than parallelizing sequential algorithms the authors develop new back substitution free parallel algorithms using a bidirectional elimination technique for the solution of both dense and sparse linear equations They provide full coverage of bidirectional parallel algorithms based on Gaussian elimination LU factorization Householder reductions and modified Gram Schmidt orthogonalization Givens rotations sparse Cholesky factorization and sparse factorization clearly demonstrating how the bidirectional approach allows for improved speedup numerical stability and efficient implementation on multiprocessor systems Plus the book offers a useful survey of the vast literature on direct methods introductory material on solving systems of linear equations and exercises It is an invaluable resource for computer scientists researchers in parallel linear algebra and anyone with an interest in parallel programming **BOOK JACKET**

Fundamentals of Distributed Object Systems Zahir Tari, Omran Bukhres, 2001-03-07 Distributed Object Computing teaches readers the fundamentals of CORBA the leading architecture for design of software used in parallel and distributed computing applications Since CORBA is based on open standards it is the only effective way to learn object oriented programming for distributed systems This language independent book allows material to be taught using Java C or other Object Oriented Programming Languages

Journal of the Institution of Electronics and Telecommunication Engineers, 1989 **IEEE TENCON'90**, 1990 Computational Collective Intelligence Tadeusz M. Szuba, 2001-03-07 Introducing a groundbreaking approach to understanding measuring and applying Collective Intelligence Does Collective Intelligence CI exist and if so how can it be characterized quantified and harnessed Questions such as these continue to be hotly debated within both the scientific and philosophical communities Yet few researchers working in the fields of artificial intelligence or distributed computing doubt CI s enormous potential value to the future of computing Unfortunately for lack of a rigorous formal theory of Collective Intelligence most attempts to analyze CI systems have been disappointing at best In Computational Collective Intelligence Professor Tadeusz Szuba does much to rectify that situation by developing for the first time both a formal definition of CI and practical guidelines for its assessment and applications Working from the ground up Dr Szuba begins with a stimulating and insightful discussion of the types of intelligence including individual artificial and collective into which he brings ideas from AI information theory and distributed computing as well as psychology sociology animal behavior cognitive science and other relevant disciplines He tackles the problem of computational models for simulating and measuring CI He explores all theoretically feasible models of CI computations and presents a groundbreaking nondeterministic approach using the Random PROLOG Processor RPP as a CI

modeling and evaluation tool He then introduces the Collective Intelligence Quotient IQS and develops clear cut guidelines for measuring it In the final chapters he lays the foundation for a dynamic new discipline Collective Intelligence Engineering CIE and considers its potential applications as an organizational restructuring tool *IEICE Transactions on Fundamentals of Electronics, Communications and Computer Sciences* ,1992 *Proceedings of the International Topical Meeting Advances in Mathematics, Computations, and Reactor Physics* ,1991 **Internet-Based Workflow Management** Dan C.
