Tinsmith's Helper and Pattern Book H. K. Vosburgh,1994-09-01 The aim in preparing this little manual has been to make it a guide for the apprentice journeyman and master sheet metal worker To this end the author collected everything of value on the subject and then boiled it down to a well arranged series of simple problems on the different phases of pattern drafting which the mechanic has to puzzle over daily The section on Mensuration will be found both accurate and complete and the rules and examples are reduced to the plainest language so that any one may understand them Realizing the value of reliable data he included all the tables of weights of materials measures of area capacity etc to which the sheet metal worker has occasion to refer together with many excellent recipes formulas and rules which will be found of great service The present edition has been carefully edited and revised by William Neubecker expert pattern cutter and instructor at the New York Trade School While the greater portion of the work remains intact quite a number of important changes have been made to insure greater accuracy and many simpler methods have been included      The New Tinsmith's Helper and Pattern Book Hall V. Williams (pseud.),1923      The New Tinsmith's Helper and Pattern Book (Classic Reprint) Hall V. Williams,2015-08-09 Excerpt from The New Tinsmith s Helper and Pattern Book For many years The

Tinsmith's Helper and Pattern Book has been one of the most popular books on tinsmithing and elementary sheet metal work. It is to be found in the majority of the shops because it explains the elements of pattern drafting and shows how the rules of mensuration are applied to the problems which come up daily. This New Helper is an outgrowth of that practical guide. At first it was intended to merely revise the old book but it soon became apparent that an entirely new treatment of the subject was necessary in order to cover the ground. This book is new with the exception of the chapter on Mensuration which has been rearranged and amplified and possibly some fifty pages of problems and tables which are classified according to the phase of the work they cover. The present work has 360 pages, 248 figures and 92 tables as against the 120 pages, 53 figures and 24 tables contained in the former work. The additional matter covers simple geometry and every phase of modern pattern cutting from the making of every type of seam lap and joint to conical problems and tinware elbows, piping ducts, gutters, leaders, cornice and skylight work and furnace fittings.
