**code generation for tracking and sensor fusion matlab** - Jul 20 2022

web after generating c code you can generate executable code which in many cases runs faster than the matlab code the improved run time can be used to develop and deploy real time sensor fusion and tracking systems it also provides a better way to batch test the tracking systems on a large number of data sets

**multi sensor data fusion method based on self attention** - Nov 23 2022

web nov 3 2023 in 3d reconstruction tasks single sensor data fusion based on deep learning is limited by the integrity and accuracy of the data which reduces the accuracy and reliability of the fusion results to address this issue this study proposes a multi sensor data fusion method based on a self attention mechanism a multi sensor data fusion

web estimation filters use various estimation filters like kalman filters multimodel filters and particle filters to estimate object states these filters have been optimized for specific scenarios such as linear or nonlinear motion models or incomplete observability automatically tune tracking filter for multi object tracker
