The Postcolonial Unconscious Neil Lazarus, 2011-06-30 The Postcolonial Unconscious is a major attempt to reconstruct the whole field of postcolonial studies In this magisterial and at times polemical study Neil Lazarus argues that the key critical concepts that form the very foundation of the field need to be re assessed and questioned Drawing on a vast range of literary sources Lazarus investigates works and authors from Latin America and the Caribbean Africa and the Arab world South Southeast and East Asia to reconsider them from a postcolonial perspective Alongside this he offers bold new readings of some of the most influential figures in the field Fredric Jameson Edward Said and Frantz Fanon A tour de force of postcolonial studies this book will set the agenda for the future probing how the field has come to develop in the directions it has and why and how it can grow further

*States of Imagination* John D. McLaren, 2001 The nation states of Asia and the South Pacific that were formerly ruled by Britain or the United States have in common their colonial past and the civil institutions inherited from it the widespread use of the English language and the problem of building new nations amid cultural ethnic religious and linguistic diversity This study examines the ways writers in English have dealt with these problems in India Pakistan Malaysia Singapore Philippines and Australia where nationalism remains a potent force alternatively responsible for save bloodletting and for supporting a frame of order within which citizens can go freely about their business Constitutions designed on the Westminster model attempt to preserve between individual and communal rights a balance that is challenged by the presence of competing ethnic linguistic or religious groups Governments in these societies can impose order by power but they can achieve authority only by developing open forms of nationality that give legitimacy to variety This nationality may be based on an appeal to a common tradition in the past or to a vision of openness in the future The works of fiction examined here are all characterised by attempts to locate the time of varying pasts in particular locations in the present and to imagine viable nations for the future The book concludes with a suggestion of an open form of nationalism as an alternative to exclusive nationalisms that serve only to exclude much of the populations they call to solidarity
