

What are fossils?

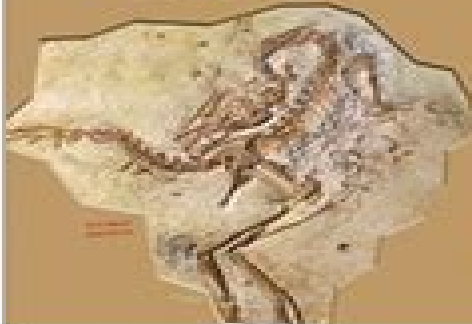

- Fossils are the remains of dead animals or plants
- Fossils are really, really old - millions of years old
- Fossils are found in sedimentary rocks
- Most fossils were formed when a plant or animal died and became buried in sediment
- As the sediment built up it hardened and formed layers of rock
- The plant or animal rotted away but left the shape of it behind
- This filled with minerals that hardened, forming a cast in the shape of the plant or animal - a copy, made out of rock!
