

Storing gifts of the earth

By **John G. Miller**

Storing grain, the first step in the process of turning the harvest into food, is a critical part of the food chain. The National Grain and Conservation Bank, which was established in 1980, is the largest grain storage facility in the world. It is located in Decatur, Illinois, and has a capacity of 1.5 billion bushels of grain. The bank is owned and operated by the U.S. Department of Agriculture. It provides a safe and secure place for farmers to store their grain until it is needed for consumption or export.
