

Research on the problems and Countermeasures of teachers' Continuing Education from the perspective of educational informatization

Juming Li

NewYork University, NewYork 10012, USA

Abstract. Teachers' continuing education is an important link in the development and training of teachers' professional talents in China. Under the background of the COVID-19 epidemic, the wave of educational informatization has provided more opportunities and challenges for teachers' continuing education. This study compares the current situation of teachers' continuing education in China and proposes targeted countermeasures for problems in three areas: training design, training content and form, and training management and evaluation.

Keywords: Education informatization; Continuing education; Teacher training.

1. Introduction

In the new era, education informatization has brought a broader development path for teachers' continuing education and training. With the continuous development of emerging technologies such as artificial intelligence, blockchain and "Internet+", more and more information technology is used in teaching, which provides more opportunities and challenges for teachers' continuing education and training. In the era of education informatization 2.0 [1], teachers' continuing education and training have become more focused on the "innovative integration" of information technology and education, and on the ways and means to effectively improve teachers' teaching and learning with the support of information technology.

During the period of COVID-19, the country adopted the long-term and large-scale online teaching method of "stopping classes without stopping teaching", which reflected the important value of education informatization, but also made teachers' continuing education faces new problems. The action plan for education informatization 2.0 emphasizes on vigorously improving teachers' information literacy and promoting teachers' self adaptation to technological changes [2]. Therefore, how to further improve the continuing education level of teachers under the background of educational informatization has become a hot issue that needs to be studied.

2. Current situation of teachers' continuing education development under the background of educational informatization

Training is an important way for teachers to improve their professional level and enhance their teaching skills. In this study, the concept of teachers' continuing education specifically refers to in-service school teacher training, that is, training for post-service continuing teacher education [3]. Teachers' continuing education is an educational investment activity that improves teachers' teaching and research, professional satisfaction and academic career development through the systematic design, organization, and implementation of training programs. Teacher continuing training is an important way to promote teachers' professional development and literacy, and is the embodiment of lifelong learning for teachers. Obtaining higher professional skills, professional identity and professional development through post-service training is an important purpose of teacher continuing training [4].

At present, China has formed a five-tier training system of "national training, provincial training, municipal training, county training and school-based training", which basically covers all forms of training for primary and secondary school teachers [5]. In 2010, China began to implement the National Training Program for Primary and Secondary School Teachers (the "National Training

Problems In Continuing Education:

Embracing the Track of Phrase: An Psychological Symphony within **Problems In Continuing Education**

In some sort of consumed by monitors and the ceaseless chatter of quick connection, the melodic splendor and psychological symphony produced by the written term usually disappear into the background, eclipsed by the relentless noise and interruptions that permeate our lives. Nevertheless, set within the pages of **Problems In Continuing Education** a stunning fictional value full of organic emotions, lies an immersive symphony waiting to be embraced. Constructed by an elegant musician of language, that interesting masterpiece conducts visitors on a mental journey, skillfully unraveling the hidden songs and profound impact resonating within each cautiously constructed phrase. Within the depths of this touching assessment, we can investigate the book is key harmonies, analyze its enthralling publishing model, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
