J. Beattie,R. D. Reader,2013-11-11 Our aim in writing this book has been to present for R D Managers at all levels the type of quantitative methods that have been developed in recent years for the more efficient management of R D Hence we have sought to write for anyone connected with the control of R D from the Directors responsible for the R D effort of a large organization to the scientist in charge of one or two individual projects Many of the techniques which we describe have appeared in recent years in the technical journals often in a largely theoretical form Few however have been made generally available in the management literature and it has been our intention to fill this need In doing this we have concentrated on the tactical aspects of R D Management for example project evaluation and research programme selection To set these in context we have also sought briefly to show how the R D programme stems from the objectives of an organization as regards overall research strategy We have thus dealt with quantitative management techniques that have seen practical application in R D laboratories and have described a number of actual applications to illustrate the method of use in practice For the sake of simplicity we have referred to Appendices all detailed mathematics and other material not essential to an understanding of the main theme We trust that the reader will discover something of use in these pages *Catalogue* Kansas State Agricultural College,Kansas State College of Agriculture and Applied Science,Kansas State University,1918 **Quantitative Analysis for Management** Barry Render,Ralph M.
