Rotting Face R. G. Robertson, 2001 The smallpox epidemic of 1837 1838 forever changed the tribes of the Northern Plains a Before it ran out of human fuel the disease claimed 20 000 souls a R G Robertson tells the story of this deadly virus with modern implications **The Face in the Picture** Katharine Tynan, 1927 **Ecology and Ethnogenesis** Adam R. Hodge, 2019-04-01 In Ecology and Ethnogenesis Adam R Hodge argues that the Eastern Shoshone tribe now located on the Wind River Reservation in Wyoming underwent a process of ethnogenesis through cultural attachment to its physical environment that proved integral to its survival and existence He explores the intersection of environmental indigenous and gender history to illuminate the historic roots of the Eastern Shoshone bands that inhabited the intermountain West during the nineteenth century Hodge presents an impressive longue dur e narrative of Eastern Shoshone history from roughly 1000 CE to 1868 analyzing the major developments that influenced Shoshone culture and identity Geographically spanning the Great Basin Rocky Mountain Columbia Plateau and Great Plains regions Ecology and Ethnogenesis engages environmental history to explore the synergistic relationship between the subsistence methods of indigenous people and the lands that they inhabited prior to the reservation era In examining that history Hodge treats Shoshones other Native peoples and Euroamericans as agents who through their use of the environment were major components of much broader ecosystems The story of the Eastern Shoshones over eight hundred years is an epic story of ecological transformation human agency and cultural adaptation Ecology and Ethnogenesis is a major contribution to environmental history ethnohistory and Native American history It explores Eastern Shoshone ethnogenesis based on interdisciplinary research in history archaeology anthropology and the natural sciences in devoting more attention to the dynamic and often traumatic history of precontact Native America and to how the deeper past profoundly influenced the postcontact era **The Tainted Gift** Barbara Alice Mann, 2009-09-03 For the first time an accomplished scholar offers a painstakingly researched examination of the United States involvement in deliberate disease spreading among native peoples in the military conquest of the West The speculation that the United States did infect Indian populations has long been a source of both outrage and skepticism Now there is an exhaustively researched exploration of an issue that continues to haunt U S Native American relations Barbara Alice Mann s *The Tainted Gift* *The Disease Method of Frontier Expansion* offers riveting accounts of four specific incidents The 1763 smallpox epidemic among native peoples in Ohio during the French and Indian War the cholera epidemic during the 1832 Choctaw removal the 1837 outbreak of smallpox among the high plains peoples and the alleged 1847 poisonings of the Cayuses in Oregon Drawing on previously unavailable sources Mann s work is the first to give one of the most controversial questions in U S history the rigorous scrutiny it requires **Moon-face** Jack London, 1906 JACK LONDON 1876 1916 American novelist born in San Francisco the son of an itinerant astrologer and a spiritualist mother He grew up in poverty scratching a living in various legal and illegal ways robbing the oyster beds working in a canning factory and a jute
