Maximum Entropy In Action:

Maximum Entropy in Action Brian Buck, Vincent A. Macaulay, 1991 This book is a collection of introductory interdisciplinary articles and lectures covering the fundamentals of the maximum entropy approach a powerful new technique that provides a much needed extension of the established principles of rational inference in the sciences Maximum entropy allows the interpretation of incomplete and noisy data providing a description of the underlying physical systems It has found application in both practical and theoretical studies ranging from image enhancement to nuclear physics and from statistical mechanics to economics The work explores these applications with specific problems of data analysis taken from the physical sciences It will interest all physical scientists who deal with data and its interpretation including statisticians and statistical physicists *Maximum Entropy in Action* Brian Buck, Vincent A. Macaulay, 2023 An account of the maximum entropy method and the related Bayesian probability theory which are used to resolve the true structures underlying many types of data The text aims to explain the role that entropy plays in the assignment of probabilities **Dictionary of Scientific Principles** Stephen Marvin, 2012-11-27 Dictionary of Scientific Principles presents a unique and timeless collection of almost all known rules or laws commonly called principles identified throughout the history of scientific development their definition and use Exploring a broad range of disciplines the book first lists more than 2 000 principles organized in a standard alphabetical order then provides a list of subject headings for which related principles are identified A staple addition to every library the dictionary will also be of interest to scientists and general readers Bayesian Inference and Maximum Entropy Methods in Science and Engineering Ali Mohammad-Djafari, 2001-06-08 Bayesian inference and maximum entropy methods are central points of new scientific inference in mathematical physics and in all inverse problems in engineering and all probabilistic data analysis This volume contains peer reviewed selection of the papers presented at this international workshop Topics included are axiomatics and concepts bayesian parameter estimation algorithms for bayesian computation deconvolution and source separation quantum tomography tomographic imaging and image processing as well as bayesian inference in applications Reinforcement Learning Phil Winder Ph.D., 2020-11-06 Reinforcement learning RL will deliver one of the biggest breakthroughs in AI over the next decade enabling algorithms to learn from their environment to achieve arbitrary goals This exciting development avoids constraints found in traditional machine learning ML algorithms This practical book shows data science and AI professionals how to learn by reinforcement and enable a machine to learn by itself Author Phil Winder of Winder Research covers everything from basic building blocks to state of the art practices You ll explore the current state of RL focus on industrial applications learn numerous algorithms and benefit from dedicated chapters on deploying RL solutions to production This is no cookbook doesn t shy away from math and expects familiarity with ML Learn what RL is and how the algorithms help solve problems Become grounded in RL fundamentals including Markov decision processes dynamic programming and temporal difference learning Dive deep into a

range of value and policy gradient methods Apply advanced RL solutions such as meta learning hierarchical learning multi agent and imitation learning Understand cutting edge deep RL algorithms including Rainbow PPO TD3 SAC and more Get practical examples through the accompanying website

Maximum Entropy and Bayesian Methods Kenneth M. Hanson, Richard N. Silver, 1996 This volume contains the proceedings of the Fifteenth International Workshop on Maximum Entropy and Bayesian Methods held in Santa Fe New Mexico U S A from July 31 August 4 1995 Maximum entropy and Bayesian methods are widely applied to statistical data analysis and scientific inference in the natural and social sciences engineering and medicine Practical applications include among others parametric model fitting and model selection ill posed inverse problems image reconstruction signal processing decision making and spectrum estimation Fundamental applications include the common foundations for statistical inference statistical physics and information theory Specific sessions during the workshop focused on time series analysis machine learning deformable geometric models and data analysis of Monte Carlo simulations as well as reviewing the relation between maximum entropy and information theory Audience This book should be of interest to scientists engineers medical professionals and others engaged in such topics as data analysis statistical inference image processing and signal processing
