Regional Competition Peter W.J. Batey, Peter Friedrich, 2013-03-14 Many parts of the world are currently experiencing the outcome of processes of economic integration globalization and transformation Technological advances in telecommunications and in transport facilities have opened up new possibilities for contracts and exchanges among regions External effects among regions have increased in importance As a result competition among regions has intensified Except some pioneering work by regional scientists and scholars of public finance and economics the phenomenon of regional competition has yet to attract the attention it warrants despite its importance for policy making The present volume is intended to remedy this neglect by providing high level contributions to the three main topics of the book the theory of regional competition methods of analysis of regional competition and policies of regional competition Innovation, Agglomeration and Regional Competition Charlie Karlsson, B. Johansson, Roger Stough, 2010-01-01 The rise of globalization has triggered a fundamental rethinking about the role of regions in economic development policy In this important new book Karlsson Johansson and Stough assemble a cast of leading international scholars to unravel the new role for regions and local economic development policy to harness the possibilities unleashed by the forces of globalization This book contains important new insights and ideas that will be welcomed by both scholars and policymakers David B Audretsch Indiana University Bloomington US and WHU Germany This book provides a state of the art overview of current research on regional competition and co operation Developing our current understanding of the new role of regions and their behaviour this book addresses questions such as How and why do regions compete How does competition between border regions operate Which regions are successful and which regions fail What are the implications of regional competition in terms of resource allocation the location of economic activities and the distribution of incomes The book illuminates a number of critical theoretical and empirical issues relating to the competitive and cooperative nature of regions as well as highlighting a number of new case studies from a variety of countries The book will be a useful enhancement to undergraduate and post graduate courses in economics economic geography regional science regional planning business administration and international and industrial management It will also be an invaluable guidance tool for researchers consultants and policy makers in international organizations such as the EU the World Bank and the OECD *Constitution and Rules for County, District, and State Contests in Debate, Declamation, Spelling, Essay Writing, Music Memory, Extemporaneous Speech and Athletics (varies Slightly)* University Interscholastic League (Tex.), 1947 **Fresh Perspectives: Economics**,

Competitiveness of the ASEAN Countries Philippe Gugler, Julien Chaisse, 2010-01-01 In an age in which it is increasingly necessary for nations to consider their competitiveness and at a time when the world economy is facing recession this book explores the possible trajectory of ASEAN arguably one of the most dynamic areas in the world as a regional economic and political bloc This important and timely study focuses on the role of foreign direct investment in

advancing the performance of ASEAN and the competitiveness of its firms whereas other studies typically focus solely on the role of trade. The expert contributors, an interdisciplinary assembly of economists, lawyers, and political scientists, present a comprehensive view of ASEAN's experiences over the past decade, addressing the industrial competitiveness of ASEAN and analysing the role of MNEs against the background of the challenges of integration. They illustrate that regional integration will only be a success if ASEAN's linkages are broadened with global partners through negotiations of Free Trade Agreements. The book concludes that although much still remains to be done and many promises are still to be unveiled, ASEAN's coming of age is an historic milestone. Competitiveness of the ASEAN Countries will appeal to a broad readership including students, academics, and researchers with an interest in Asian studies, international business, international economics, and international law.
