## **Regions In Recession And Resurgence:**

*Regions in Recession and Resurgence* Michael Chisholm, 2015-03-27 The world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government

Rebalancing for Sustainable Growth Masahiro Kawai, Jong-Wha Lee, 2015-04-30 The Asian model of export led growth served it well in the post war period but prolonged sluggish growth of the developed economies following the global financial crisis together with growing inequality and rising environmental problems point to the need for a new growth model The purpose of this book is to describe the challenges facing Asian economies in the post global financial crisis environment and to identify structural issues and policies that can help guide Asian policymakers to expand the growth potential of domestic and regional demand in coming years and thereby create a basis for balanced sustainable and inclusive long term growth These issues and policies span a variety of dimensions including macroeconomic policy monetary fiscal and foreign currency management real sector issues trade and industrial structure infrastructure development labor market and social policy financial sector reform and regulation and regional cooperation and architecture Key recommendations to achieve these goals include measures to deepen social protection to support social resilience increase infrastructure investment to create a seamless Asia enhance productivity in the services sector establish a region wide free trade agreement to encourage intraregional trade in goods and services and investment through economies of scale and dynamic efficiency of a larger market promote a shift to a low carbon society and support green growth and deepen and integrate financial markets to facilitate the recycling of Asia's high savings for investment within the region **The Crisis and Renewal of American**

**Capitalism** Laurence Cossu-Beaumont, Jacques-Henri Coste, Jean-Baptiste Velut, 2015-12-22 Despite the reversal of America's fortune from the triumphalism of the Roaring Nineties to the gloom of the lost decade and the Great Depression theoretical conceptions of US capitalism have remained surprisingly unchanged. In fact, if the crisis questioned the sustainability of the US capitalist paradigm, it did not fundamentally challenge academic theorization of American political economy. This book departs from the American political economy literature to identify three common myths that have shaped our conceptualization of US capitalism: its reduction to a state-market dyad, disembedded from societal factors; the illusion of a weak state; and the synchronic conception of the US variety of capitalism. To remedy these pitfalls, the authors propose a civilizational approach to American political economy at the crossroads between cultural studies, history, sociology, and political science. Drawing together contributions from a rich variety of fields, from geography to cultural studies, political science, and sociology, this work sheds a new light on America's cultural political economy, combining theoretical reflection with empirical data and offering innovative perspectives on the crisis and renewal of American capitalism. *Illinois Business Review*, 1996

**The Asian Economy** Dilip Das, 2013-07-03 The global financial crisis of 2007-09 and the Great Recession that it engendered were both a challenge and an opportunity for Asia. The region not only remained unharmed by the global financial crisis initially but also recovered the fastest. In addition, it was also the principal driver of the global recovery. This book analyzes the impact of the global financial crisis and the Great Recession on the Asian economy. Chapters look at the most significant issues related to the Asian economy during the crisis: how it coped with them and how it eventually emerged from them. Dilip K. Das discusses how the Asian economy, particularly the emerging market economies, spearheaded the recovery of the global economy from the global financial crisis and recession and goes on to look at how this is of historical significance. Written in a clear, comprehensive, and critical manner, this book covers the contemporary academic and policy debates on Asia's role in the world economy. As such, it is an essential read for students, researchers, and public policy professionals interested in Asian Economics, as well as studies in the International Political Economy. **Draft 2001**
