Religion And Personality:

Religion and Personality Adrian L. Van Kaam, 1964 An extensive and meaningful consideration of the growth of the religious personality Religion, Personality, and Social Behavior Vassilis Saroglou, 2013-07-24 Psychological interest in religion in terms of both theory and empirical research has been constant since the beginning of psychology However since the beginning of the 21st Century partially due to important social and political events and developments interest in religion within personality and social psychology has increased This volume reviews the accumulated research and theory on the major aspects of personality and social psychology as applied to religion It provides a high quality integrative systematic and rigorous review of that work with a focus on topics that are both central in personality and social psychology and have allowed for the accumulation of solid and replicated and not impressionist knowledge on religion The contributors are renowned researchers in the field who offer an international perspective that is both illuminating yet neutral with respect to religion The volume's primary audience are academics researchers and advanced students in social psychology but it will also interest those in sociology political sciences and anthropology

Culture, Personality, and the Psychology of Religion Gerard Saucier, 2022-06-27 Culture and personality are deeply related Gerard Saucier articulates their interface and new insights regarding the psychology of religion and spirituality Rather than making assumptions of cultural homogeneity that promote stereotyping Gerard Saucier applies a distributive model of culture which assumes heterogeneity linking the otherwise separate compartments of culture and personality Personality variation maps cultural non uniformity but variation in mindset attitudes beliefs values does so more directly Studies of isms concepts embedded in natural language demonstrate that matters of religion and spirituality make up a substantial fraction of culture relevant mindset and empirical evidence shows these have a large effect size contribution to cultural differences between nations around the globe This book will be of much interest to specialists and post graduate graduate students interested in culture personality and religion or spirituality

Religion, Personality, and Mental Health Laurence B. Brown, 2012-12-06 LAURENCE B BROWN Nearly all the papers in this collection were prepared initially by a group of psychologists interested in the social scientific study of religion They included some working with the mentally ill in medical religious or secular contexts as well as teachers and researchers in psychology or theology Their papers aim to test or to reflect on common prejudices about the links between mental health and religion especially when they are thought to be mediated by personality characteristics All the papers have been revised for this collection A clear consensus emerged that religion has many positive effects despite Wulff's 1991 p 307 unguarded assertion that without question the mentally disturbed are frequently attracted by religion Any assumption that religion is necessarily a danger to health or closely related to mental illness is not supported by the evidence from carefully controlled studies that follow a social science perspective Malony's paper page 16 in this collection therefore emphasizes that we must take account of the ways in which anyone's religion is integrated into their life the functions it

serves for them and their acceptance by other members of the religious and other groups to which they belong

Religion in Personality Theory Frederick Walborn, 2013-12-03 Religion in Personality Theory makes clear the link between theory and research and personality and religion Presently most personality texts have a limited discussion of religion and reference few theorists other than Freud and Maslow in relation to the subject This book reviews the theory and the empirical literature on the writings of 14 theorists Every chapter concludes with a summation of the current research on the theorist's proposals Reviews Frederick Walborn has written an excellent text that explores the degree to which classical personality theorists were personally influenced by and focused upon religion in developing their personality theories Each theorist is presented in sufficient detail so that their personal views of religion are seen to influence the theories they developed In addition the current status of the empirical evidence in the psychology of religion is explored in the context of the theorist and theory to which the data is most relevant Current and up to date this text is appropriate for either a course in Personality or as an introduction to the Psychology of Religion The author's own comprehensive theory of religion and spirituality creatively integrates the positive contributions of the classical personality theorist to the contemporary psychology of religion Ralph W Hood Jr Professor of Psychology University of Tennessee at Chattanooga In this interesting and accessible book Frederick Walborn thoughtfully probes the place of religion and spirituality in the writings of a broad range of classical psychological thinkers and offers an insightful critique of current empirical research on the complex relation of religion and spirituality to individual well being Michele Dillon Ph D Professor and Chair Department of Sociology University of New Hampshire Durham New Hampshire Identifies what major personality theorists say about religion Investigates whether evidence supports or refutes predictions made by different theories Concludes with a comprehensive integrative theory on religion and spirituality

Religion and Personality in the Spiral of Life David Belgum, 2000

Faith and Psychology Leslie J. Francis, 2005-01 Once seen as a major enemy of faith psychology is now recognised as a key ally and friend by many Christians In this clear and challenging book Leslie J Francis demonstrates how the theory of psychological type can help us to understand better the shape of our personal spirituality our preferences in public worship and the nature of our religious experience Leslie J Francis offers a careful description of each of the eight components of psychological type extraversion and introversion sensing and intuition feeling and thinking judging and perceiving together with a brief test to help you locate your own psychological preferences He shows how such analysis can lead to greater self awareness greater insight into others and into the nature of the God who created men and women in God's own image
