Selected Addresses 1920-1930:

American Literature in Transition, 1920-1930 Ichiro Takayoshi, 2017-12-28 *American Literature in Transition 1920-1930* examines the dynamic interactions between social and literary fields during the so-called Jazz Age. It situates the era's place in the incremental evolution of American literature throughout the twentieth century. Essays from preeminent critics and historians analyze many overlapping aspects of American letters in the 1920s and re-evaluate an astonishingly diverse group of authors. Expansive in scope and daring in its mixture of eclectic methods, this book extends the most exciting advances made in the last several decades in the fields of modernist studies, ethnic literatures, African American literature, gender studies, transnational studies, and the history of the book. It examines how the world of literature intersected with other arts such as cinema, jazz, and theater and explores the print culture in transition with a focus on new publishing houses, trends in advertising, readership, and obscenity laws.

Publication ... de l'Association internationale d'hydrologie scientifique, 1958. Contains proceedings of symposia held by the Association. *The Qualified Student* Harold S. Wechsler, 2017-09-29. In *The Qualified Student* Harold S. Wechsler focuses on methods of student selection used by institutions of higher education in the United States. More specifically, he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross-section of America by extending access to an increased number of students from nontraditional backgrounds. Implicit in much of this book is an underlying social and ethical question: How legitimate was and is higher education's regulation of social mobility? Public concern over colleges and universities' practices became inevitable once they became regulators between social classes. The challenging of colleges' admissions policies in the courts augments similar concerns that have been present in legislatures for decades. The volume is divided into three main sections: Prerequisites, Columbia and the Selective Function, and Implications. It focuses mainly on four universities: The University of Michigan, Columbia University, the University of Chicago, and the City University of New York. Wechsler maintains that unlike other universities, these institutions were pacesetters; they did not adopt a new policy simply because some other college had already adopted it. A new introduction brings the book originally published in 1977 up to date and demonstrates its continuing importance in today's academic world of selective admissions.
