Regional Economic Integration:

Regional Economic Integration in East Asia Jane Drake-Brockman, Peter Drysdale, 2002 There has been a proliferation of proposals for bilateral free trade areas in East Asia in recent times These initiatives fly in the face of the long standing support of key players in the region such as Japan for the MFN based non discriminatory trading system and the commitment to non discriminatory trade liberalisation and reform within APEC As China establishes its role in the WTO its interests are very much in an open global trading system The paper argues that the core interests of East Asian economies remain in non discriminatory global trading arrangements and prosecuting those interests within the Doha Round of trade negotiations It suggests that a way forward in sorting out the trade distorting and protectionist effects of free trade agreements would be for East Asian economies to take a lead in negotiations on strengthening WTO rules on preferential trade arrangements In terms of global economic welfare the only good preferential arrangement is one that disappears in time The paper makes specific recommendations for re vamping the rule on preferential trade arrangements with that objective in mind P 1

Multilateral Vs. Regional Economic Integration? - The Middle East and North African Region Benjamin Hätinger,2010-09 Diploma Thesis from the year 2009 in the subject Business economics Economic Policy grade 2 3 University of Hohenheim language English abstract In this study it is intended to investigate today s actual economic interdependence of what we would call the Middle East and North African MENA region and to analyze its economic interweaving both among its member countries and into the global trading system Being aware of the complexity and breadth of this topic the author has chosen only three subset economic integration agreements both between the countries of the MENA region intraregional also comprising a subregional agreement and between the MENA region and other regions interregional for closer analysis Concerning the efforts made towards interregional economic integration this thesis concentrates mainly on the so called EU MED Partnership which was initiated at the Barcelona Conference in 1995 and aims to establish an EU Med Free Trade Area EMFTA by the year 2010 including the EU and the 12 so called Mediterranean countries which apart from Malta Cyprus and Turkey all belong to the MENA region In contrast on the intraregional level the latest initiative in 1997 will be examined where 17 out of 22 Arab League member states all of which also belong to the MENA region apart from Sudan joined to constitute a Greater Arab Free Trade Area GAFTA mainly to get rid of traditional trade barriers for goods On the smaller subregional level the Gulf Cooperation Council GCC consisting of 6 Gulf countries which plans the establishment of a common currency by 2010 will be examined more closely With GAFTA GCC and the EU MED Partnership all being in a different depth of integration and each representing one of the three different levels of integration subregional intraregional interregional the author holds the view that this choice reflects the actual state of integration in the region best In a nutshell this study tests the **Economic integration in NAFTA and EU: A comparative analysis** Wolf Seiler,2007-07-05 Seminar paper from the year 2005 in the subject Business economics Economic Policy grade 1 3 LMU Munich course Regionalisierung der internationalen Handelsordnung language English abstract The two regional trading agreements NAFTA and EU differ greatly not only in their economic but also political approaches to regional integration The paper describes the differences in the two regional trading agreements starting with the respective institutions and their structures After that follows an analysis of indicators of their economic integration that will in a next step allow us to assess and compare them This general assesment is followed by a more detailed comparison of how poorer members of NAFTA and EU namely the cohesion countries in the EU and Mexico in NAFTA have profited from the regional economic integration drives Concluding remarks are given on positive and negative integration in both regional agreements *Regional Economic Integration and Globalization* Michael Cora,Alan Castle,2016-04 The GATT WTO system has been founded on the

fundamental principle of non discrimination However the system has also allowed exceptional cases to this principle through several arrangements The leading examples of these cases are Regional Integration Agreements RIAs The concept of regionalization is associated with the development of the institutional conditions for the shift of goods and production between countries In the center of the regionalization process there is a function of integration groups which currently are of great importance in the world economy The number size and degree of relationships between countries which participate in integration agreements make it an important phenomenon and unique feature of the current phase of globalization There are also many different attitudes on the relationship between globalization and regionalism integration Some join them other contradict Regionalism and globalization mutually support themselves in the sense that regionalism is often the stage of globalization Regionalization may indeed be stimulating the local markets and by creating a competitive environment in the region enhance microeconomic forces necessary for responding to the needs of globalization However there are important integration features for the defense against globalization as a process of differentiating and marginalizing some societies In the case of integration we can count on a better protection against volatility of financial markets and against monetary crisis

However, as long as the approaches complement each other, considering these paradigms in tandem can have significantly positive effects on the overall status of the world economy. Regional Economy Integration and the Global Financial System addresses recent trends in regional integration projects and the strides that such projects are making on the road toward globalization. Focusing on a range of economic projects emerging supranational units and possible implications for future trends, this book is an essential reference source for professionals, scholars, and institutions interested in the dynamic effects of regionalism and globalization. *Regional Economic Integration in a Global Framework* Julie MacKay, 2005 **The Politics of Economic Regionalism** K. The authors analyze market integration manifested in interregional trade, investment, and service connections. Taking a constructivist approach, they shed new light on how national, ethnic, religious, and linguistic factors, as well as systems of government, political regimes, and models of leadership, shape foreign policy decision making in various post-Soviet countries. *Regional Economic Integration and Agricultural Trade* Jun'ichi Gotō, 1997
