Hoffstot, 2015-02-24 Palm Beach is a remarkably small town to be so famous its population is only a little over 10 000 Nor is it an old town the oldest extant building dates from about 1885 and the town itself was not incorporated until after 1900 What has granted Palm Beach its fame is the same combination of elements that made Bath famous in the 18th century a very few clear sighted men they can be counted on the fingers of one hand wealthy families attracted to what these men had to offer and some remarkable architecture built when wealth and vision intermingled This book records that architecture The contents are strategically arranged so that the visitor can drive or walk the area and see the buildings sequence of location Within this compendium of photographs and descriptive text you will find more than 150 Palm Beach buildings written and photographed by a resident active in historic preservation The book does not attempt to evaluate but rather to exhibit the

richness and diversity of this extraordinary place The work of famous architects is featured notably that of Addison Mizner Marion Wyeth Maurice Fatio Howard Major John Volk and the designer Joseph Urban Also covered are the famous Breakers Hotel the Bath and Tennis Club the Everglades Club and the shops of Worth Avenue

Emotions and Architecture Francesca Lembo Fazio,Valentina Tomassetti,2023-12-19 Emotions and Architecture Forging Mediterranean Cities Between the Middle Ages and Early Modern Time explores architecture as a medium to arouse or conceal emotions to build consensus through shared values or to reconnect the urban community to its alleged ancestry The chapters in this edited collection outline how architectonic symbols images and structures were codified and sometimes recast to match or to arouse emotions awakened by wars political dominance pandemic challenges and religion As signs of spiritual and political power these elements were embraced and modulated locally providing an endorsement to authorities and rituals for the community This volume provides an overview of the phenomenon across the Italian region stressing the transnationality of selected symbols and their various declinations in local contexts It deepens the issue of refitting symbols artworks and structures to arouse emotions by carefully analysing specific cases such as the Septizodium in Rome the Holy House of Loreto in Venice and the reconstruction of L Aquila The collection through its variegated contributions offers a comprehensive view of the phenomenon exploring the issue from political social religious and public health perspectives and seeking to propose a new definition of architecture as a visual emotional language Together the chapters show how the representation of virtues and emotions through architecture was part of a symbolic practice shared by many across the Italian context This book will be of interest to researchers and students studying architectural history the history of emotions and the history of art
