Microtunneling and Horizontal Drilling French Society for Trenchless Technology (FSTT),2010-01-05 This book includes recommendations prepared by members of the French Society for Trenchless Technology FSTT based on their recent national multi year project Comprehensive guidelines techniques and theories in the areas of both microtunneling and horizontal drilling are given encompassing the fields of application for each method what investigations should be undertaken which machines and equipment should be used how the work should be managed and potential problems that may arise The recommendations the analytical methods used and their verification with laboratory and field data should not only improve the rate of success of trenchless projects but will also be of great value to engineers in other countries who can compare the results with their own findings and assess the international state of the art

Trenchless Installation of Conduits Beneath Roadways Tom Iseley,1997 This synthesis will be of interest to geologists geotechnical construction and maintenance engineers other state department of transportation DOT personnel involved with the planning design and permit issuance for conduits beneath roadways local transportation agencies utility contractors and consultants and trenchless construction equipment manufacturers It describes the current state of the practice for the use of trenchless technology for installing conduits beneath roadways Trenchless construction is a process of installing rehabilitating or replacing underground utility systems without open cut excavation The synthesis is focused on trenchless technology for new installations This report of the Transportation Research Board describes the trenchless installation technologies methods materials and equipment currently employed by state DOTs and other agencies to install conduits beneath roadways The synthesis presents data obtained from a review of the literature and a survey of transportation agencies For each technology identified information is provided to describe the range of applications basis for technique selection site specific design factors to be considered relative costs common environmental issues and example specifications In addition information on emerging technologies and research needs is presented

Micro-Tunneling Technology for Replacement Electric and Telecommunication Lines Dr. Ragaei Sadek, PhD, CE,2014-11-25 The author studied the cost effective modern solution for placing electric distribution lines and telecommunications lines underground in urban areas in the USA The methodology of the study which included examining the cost and schedule analyses as function of pipe diameter and overburden depth The study focused on the cases when trenching cannot be done Cost benefit analysis was performed particularly in urban areas The author discussed the cost and benefits of undergrounding both types of lines but focused on electric lines in Maryland and Virginia states

Microtunneling and Horizontal Drilling Comité français des travaux sans tranchée,2006 Annotation This book includes recommendations prepared by members of the French Society for Trenchless Technology FSTT based on their recent national multi year project Comprehensive guidelines techniques and theories in the areas of both microtunneling and horizontal drilling are given encompassing the fields of application for each method what
