Rendel Connection:

The Rendel Connection Michael R. Lane, 1989 This Is The Story Of The Civil Engineering Consultancy Firm Rendel Palmer And Tritton Over Its First 150 Years It Also Incorporates The First Biography Of Its Founder James Meadows Rendel Condition Good **Armstrongs of Elswick** Kenneth Warren, 1989-12-11 Armstrong the engineers armament makers and naval shipbuilders was set up in 1847 by William Armstrong at Elswick Newcastle Upon Tyne This book analyzes Armstrong's 80 years rise decline and reorganization treating it in some ways as a case study of British industrial malaise **William Armstrong** Henrietta Heald, 2011-03-01 William Armstrong was a brilliant and charismatic figure of the 19th Century a self made man whose achievements are now being more widely recognised Inventor scientist engineer and an early advocate of renewable energy he built a pioneering house in Northumberland in the North East of England called Craggside the first house in the world to be lit by hydroelectricity Armstrong's industrial powerhouse Elswick Works on the Tyne employed over 25 000 people in its heyday manufacturing hydraulic cranes warships and armaments He was a visionary who was loved and hated and feared in equal measure While he brought great fame and fortune to his native Newcastle upon Tyne and to his country as a whole he was condemned in some quarters as a merchant of death for his manufacturing of weapons of war This intimate authoritative portrait reveals as never before the extraordinary achievements of a multi faceted Victorian giant David Kynaston An excellent book hugely enjoyable Alexander Armstrong [Indian Engineering](#) , 1918 [The Dock and Harbour Authority](#) , 1998 [The Political Life of Josiah C. Wedgwood](#) Paul Mulvey, 2010 New study of the Radical politician Josiah Wedgwood setting him in context and illuminating many of the political issues of the time In his day Josh Wedgwood was one of Britain's best known and most outspoken Radical politicians He served in three wars and in a Parliamentary career lasting from 1906 to 1943 first with the Liberals and then with Labour he fought to uphold personal liberty and to limit the power of the state Instead of the collectivism of socialists or social imperialists Wedgwood advocated a Radical vision of Victorian Individualism as the solution to the problems of social inequality at home and growing threats abroad that Britain faced in the first half of the twentieth century His support of individual freedom a redistribution of landowner's wealth and a voluntary and democratic British Empire received only limited support in his own lifetime but he fought for them with vigour and passion throughout his career This study of his life throws new light upon some of the defining ideological and policy issues of the most turbulent period of modern British history PAUL MULVEY teaches at the London School of Economics **Engineer of Revolutionary Russia** Anthony Heywood, 2016-05-13 This book is the first substantial study in any language of one of revolutionary Russia's most distinguished and controversial engineers Iurii Vladimirovich Lomonosov 1876 1952 Not only does it provide an outline of his remarkable life and career it also explores the relationship between science technology and transport that developed in late tsarist and early Soviet Russia Lomonosov's importance extends well beyond his scientific and engineering achievements thanks to the rich variety and public prominence of his professional and

political activities His generation Lenin's generation was inevitably at the forefront of Russian life from the 1910s to the 1930s and Lomonosov took his place there as one of the country's best known and ultimately notorious engineers As well as an innovative engineer who campaigned to enhance the role of science he played a major role in shaping and administering the Russian railways and undertook several diplomatic and scientific missions to the West during the early years of the Revolution Falling from political favour during an assignment in Germany 1923-1927 he achieved notoriety in Russia as a non returner by apparently declining to return home Thereby escaping probable arrest and execution he began a new life abroad 1927-1952 which included a research post at the California Institute of Technology in 1929-1930 collaborative projects with the famous physicist P L Kapitsa in Cambridge a long time association with the Institution of Mechanical Engineers in London and work for the British War Office during the Second World War From Marxist revolutionary to American academic this study reveals Lomonosov's extraordinary life Drawing on a wide variety of official Russian sources as well as Lomonosov's own diaries and memoirs a vivid portrait of his life is presented offering a better understanding of how science technology and politics interacted in early twentieth century Russia

Nature Sir Norman Lockyer, 1918 *Transactions Royal Institution of Naval Architects*, 1903 *My commonplace Book* Mary Danvers Stocks, 1970 **Women in Higher Education, 1850-1970** E. Lisa Panayotidis, Paul Stortz, 2017-09-19 This edited collection illustrates the way in which women's experiences of academe could be both contextually diverse but historically and culturally similar It looks at both the micro individual women and universities and macro level comparative analyses among regions and countries within regional national trans national and international contexts The contributors integrally advance knowledge about the university in history by exploring the intersections of the lived experiences of women students and professors practices of co education and intellectual and academic cultures They also raise important questions about the complementary and multidirectional flow and exchange of academic knowledge and information among gender groups across programmes disciplines and universities Historical inquiry and interpretation serve as efficacious ways with which to understand contemporary events and discourses in higher education and more broadly in community and society This book will provide important historical contexts for current debates about the numerical dominance and significance of women in higher education and the tensions embedded in the gendering of specific academic programs and disciplines and university policies missions and mandates
