

LINEAR MODEL OF COMMUNICATION

EXPLANATION

The linear model of communication is an uncomplicated, direct way to comprehend how two different parties communicate with one another. This single-directional process occurs when a sender passes along a message without any feedback or response from the receiver.

EXAMPLE

Radio broadcasting: Radio broadcasting involves a sender sending messages to a large group of receivers, such as music or news programs. This type of communication does not include dialogue between the parties and is usually used for entertainment or information purposes.
