excessive The planning goal for individuals is to achieve recommended and adequate nutrient intakes using food based guides For group planning the report presents a new approach based on considering the entire distribution of usual nutrient intakes rather than focusing on the mean intake of the group The report stresses that dietary planning using the DRIs is a cyclical activity that involves assessment planning implementation and reassessment Nutrition and public health researchers dietitians and nutritionists responsible for the education of the next generation of practitioners and government professionals involved in the development and implementation of national diet and health assessments public education efforts and food assistance programs will find this volume indispensable for setting intake goals for individuals and groups
