Maritime And Port Security:

Port and Maritime Security Jonathon P. Vesky, 2008 The terrorist attacks of September 11 2001 heightened awareness about the vulnerability to terrorist attack of all modes of transportation Port security has emerged as a significant part of the overall debate on US homeland security The overarching issues for Congress are providing oversight on current port security programs and making or responding to proposals to improve port security The US maritime system consists of more than 300 sea and river ports with more than 3 700 cargo and passenger terminals However a large fraction of maritime cargo is concentrated at a few major ports Most ships calling at US ports are foreign owned with foreign crews Container ships have been the focus of much of the attention on seaport security because they are seen as vulnerable to terrorist infiltration More than 9 million marine containers enter US ports each year While the Bureau of Customs and Border Protection CBP analyses cargo and other information to target specific shipments for closer inspection it physically inspects only a small fraction of the containers The Coast Guard and CBP are the federal agencies with the strongest presence in seaports In response to September 11 2001 the Coast Guard created the largest port security operation since World War II The Coast Guard has advanced its 24 hour Notice of Arrival NOA for ships to a 96 hour NOA The NOA allows Coast Guard officials to select high risk ships for boarding upon their arrival at the entrance to a harbor CBP has also advanced the timing of cargo information it receives from ocean carriers Through the Container Security Initiative CSI program CBP inspectors pre screen U S bound marine containers at foreign ports of loading The Customs Trade Partnership Against Terrorism C TPAT offers importers expedited processing of their cargo if they comply with CBP measures for securing their entire supply chain To raise port security standards Congress passed the Maritime Transportation Security Act of 2002 P L 107 295 in November 2002 The focus of debate in Congress has been about whether current efforts to improve port security are adequate in addressing the threat While many agree that Coast Guard and CBP programs to address the threat are sound they contend that these programs represent only a framework for building a maritime security regime and that significant gaps in security still remain

Handbook Jonathan K. Waldron, Andrew W. Dyer, 2004-03 Maritime Security Handbook provides the regulated community with guidance for understanding and complying with the extensive new security requirements. This essential new reference contains legal analysis written by Blank Rome LLP of the new Coast Guard security regulations as well as the actual maritime security legislation enacted by Congress. Beginning July 1, 2004, vessel owners and operators must ensure their vessels are operating in compliance with these new vessel security requirements. The new regulations address such issues as port security assessments, port security plans, and other security standards, measures, and provisions. Mandated by the Maritime Transportation Security Act, these regulations include: Implementation of National Maritime Security Initiatives, Area Maritime Security, Vessel Security, Facility Security, Outer Continental Shelf Facility Security, and Automatic Identification System (AIS). Maritime Security Handbook includes easy-to-read interpretation and analysis of these new requirements. Analysis of each requirement includes the purpose and applicability of the requirement, a dissection of the language, and recommended actions. Due to the size and complexity of the requirements, these compliance guidelines are thoroughly indexed and contain a detailed table of contents for ease of use and cross-reference.
