Ursula H. Funke, 2013-04-17 Mathematical models can be classified in a number of ways e.g static and dynamic deterministic and stochastic linear and nonlinear individual and aggregate descriptive predictive and normative according to the mathematical technique applied or according to the problem area in which they are used In marketing the level of sophistication of the mathematical models varies considerably so that a number of models will be meaningful to a marketing specialist without an extensive mathematical background To make it easier for the nontechnical user we have chosen to classify the models included in this collection according to the major marketing problem areas in which they are applied Since the emphasis lies on mathematical models we shall not as a rule present statistical models flow chart models computer models or the empirical testing aspects of these theories We have also excluded competitive bidding inventory and transportation models since these areas do not form the core of the marketing field **Survival Math for Marketers** Peter C. Weiglin, 2002-07-03 Survival Math for Marketers is a simple and fun solution to the age old problem of a lack of mathematical knowledge among marketing professionals Many are former English psychology or science graduates who have become responsible for advertising promotion and sales in their organizations Without a solid grounding in accounting finance mathematics or economics they often find themselves frustrated and confused by this unfamiliar world This book provides an introduction to the underlying mathematical concepts in marketing and management in terms accessible to students of all levels Weiglin also explains the relevant non mathematical issues such as price sensitivity product distribution and sales estimates and provides the tools necessary to fully understand the basics of each Presented in an irreverent conversational style this book includes numerous real world examples and illustrations that gently introduce the reader to the important mathematical concepts behind marketing and management Intended for students and professionals of all levels Survival Math for Marketers is a fun easy to read introduction to the world of business math About the Author Peter Weiglin is an author historian and professional speaker on many topics His company Omnibus Communications specializes in marketing strategy and communications consulting for companies in the publishing and computer fields His clients have included Lockheed Hundman Publishing Hewlett Packard Apple Computer and North American Van Lines He teaches management and marketing most recently at the University of California at Berkeley Extension *Annual Catalogue*
